# THE PARTY

RedBull Playrooms: <https://vimeo.com/207023703>

# PARTY LIKE IT'S 2099!

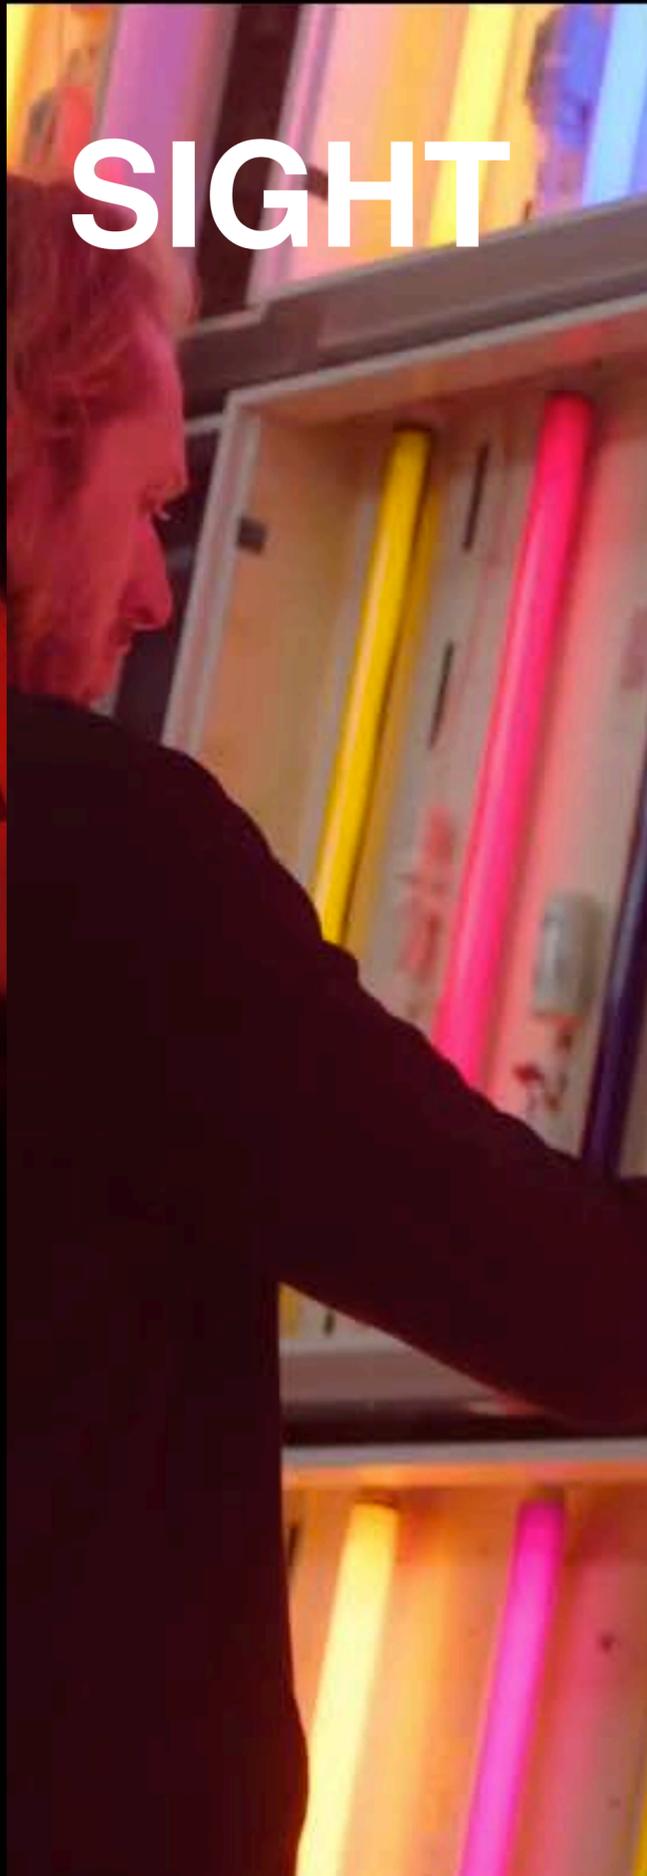

- ◆ 2 nights, 7 hours & ~ 500 guests per night
- ◆ Michelin\* Dinner: 75 Friends of RedBull
- ◆ 2 Dance Floors, Chill-out (overdrive) Room, Bars...
- ◆ Selected Artists/DJs
- ◆ Iconic Building: Bugenhuis

**SMELL**

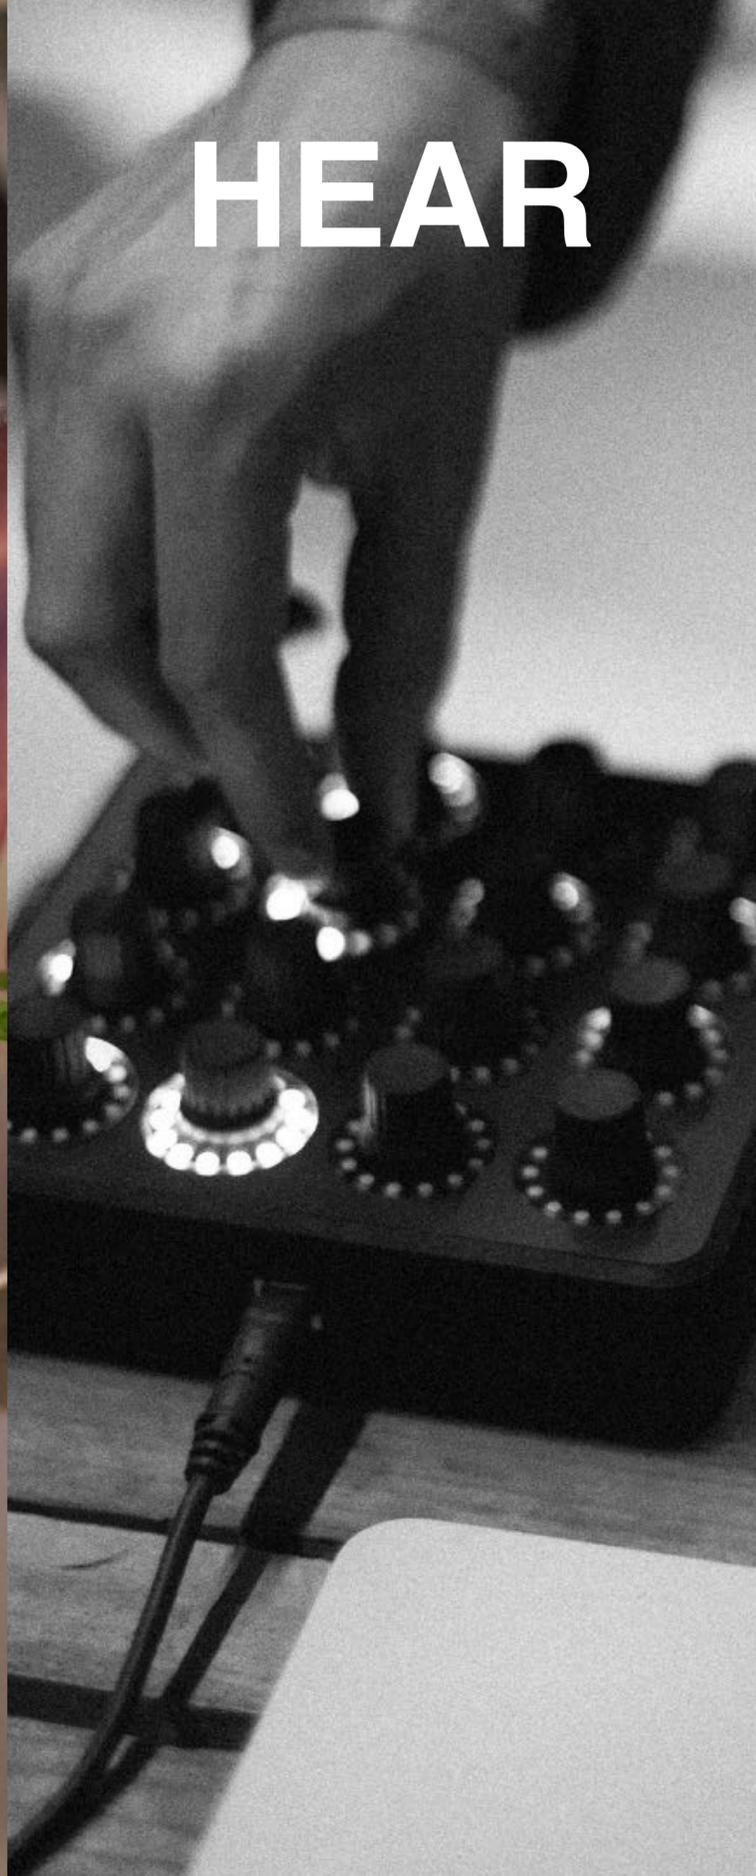

**SIGHT**

**TASTE**

**HEAR**

**TOUCH**

**CAPTURE THE EXPERIENCE  
& SHARE IT BACK**

# CAPTURING THE EXPERIENCE

HOW DO WE MAKE PEOPLE  
FORGET ABOUT BEING TRACKED?

# YARNS

## Natural

- Wool
- Hennep
- Cotton
- Silk

## Synthetic

- Polyester
- Nylon
- Acrylic

## Other

- Soy
- Bamboo
- Corn

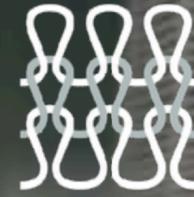

# MACHINE

## Weaving (Dornier)

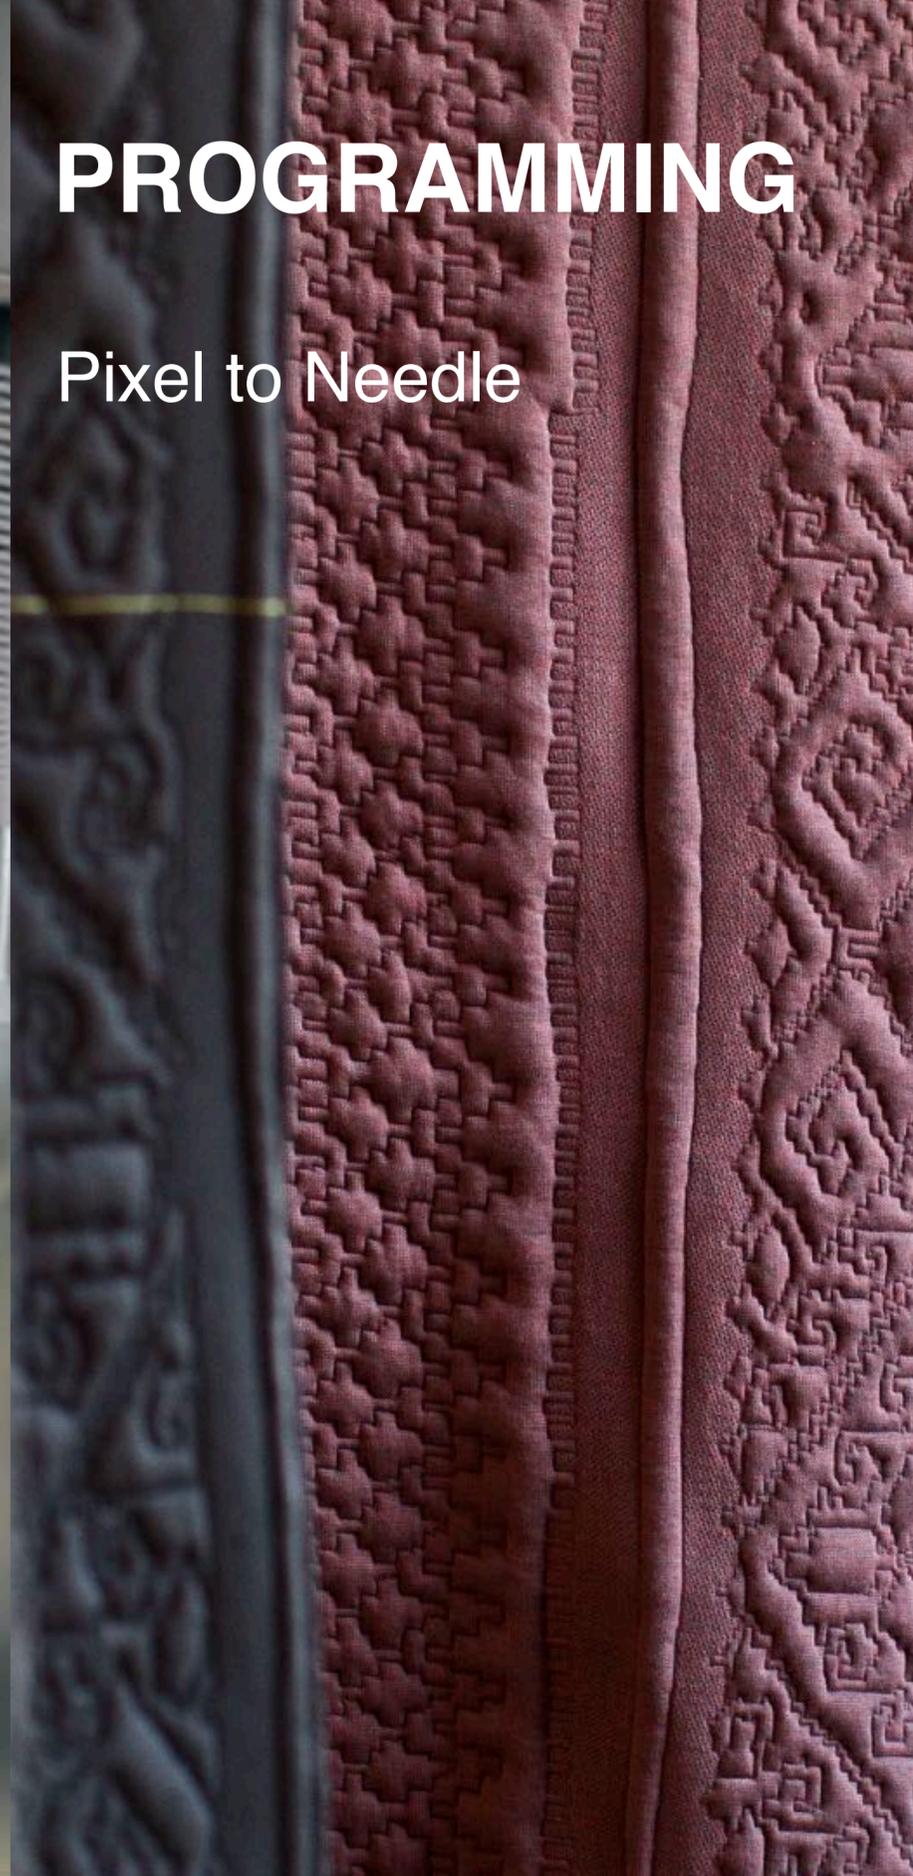

# MACHINE

## Circular knitting (Santoni)

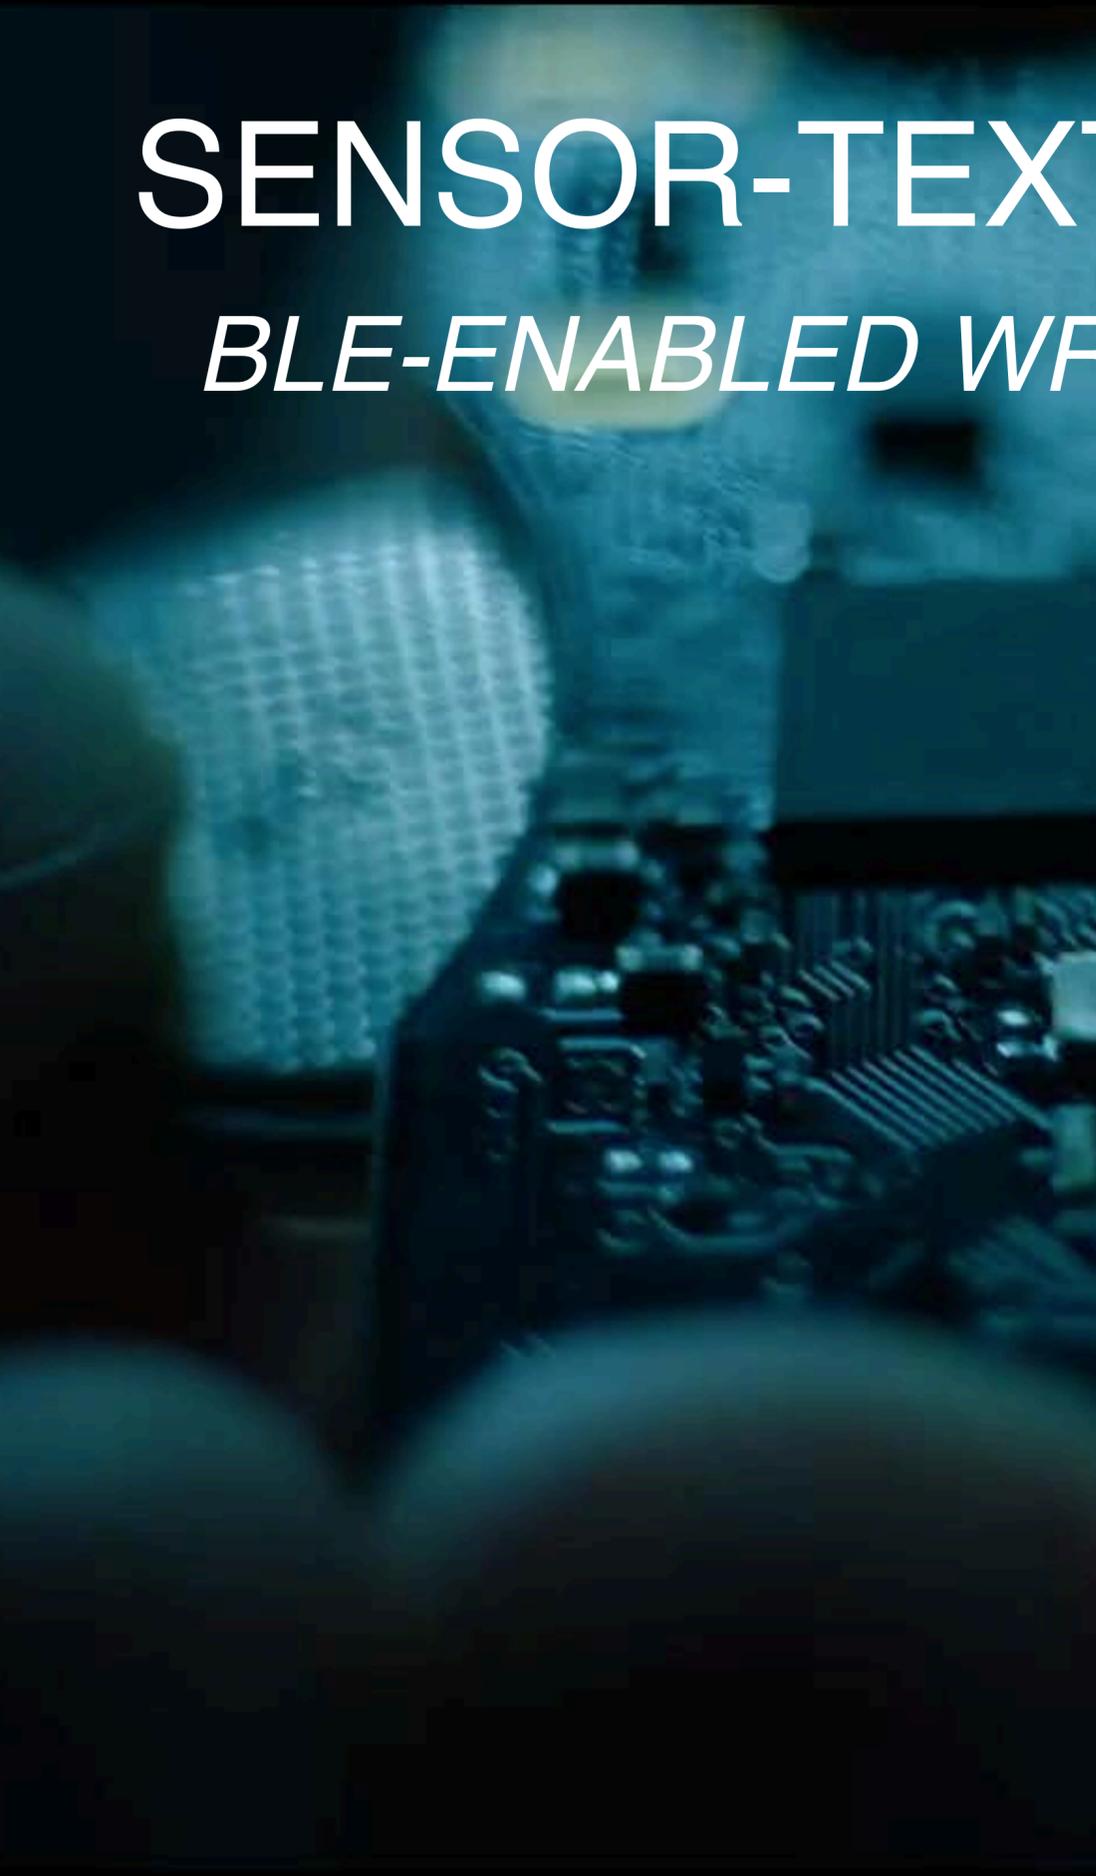

# PROGRAMMING

## Pixel to Needle

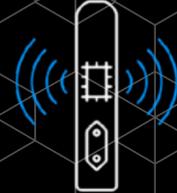

# SENSOR-TEXTILE INTEGRATION

## *BLE-ENABLED WRISTBANDS*

# 900 X VIP

Estimote Stickers

Programmed in the factory

Data: Temperature & Accelerometer

Period: 1.25 / 2.5 seconds

# 100 X FOR

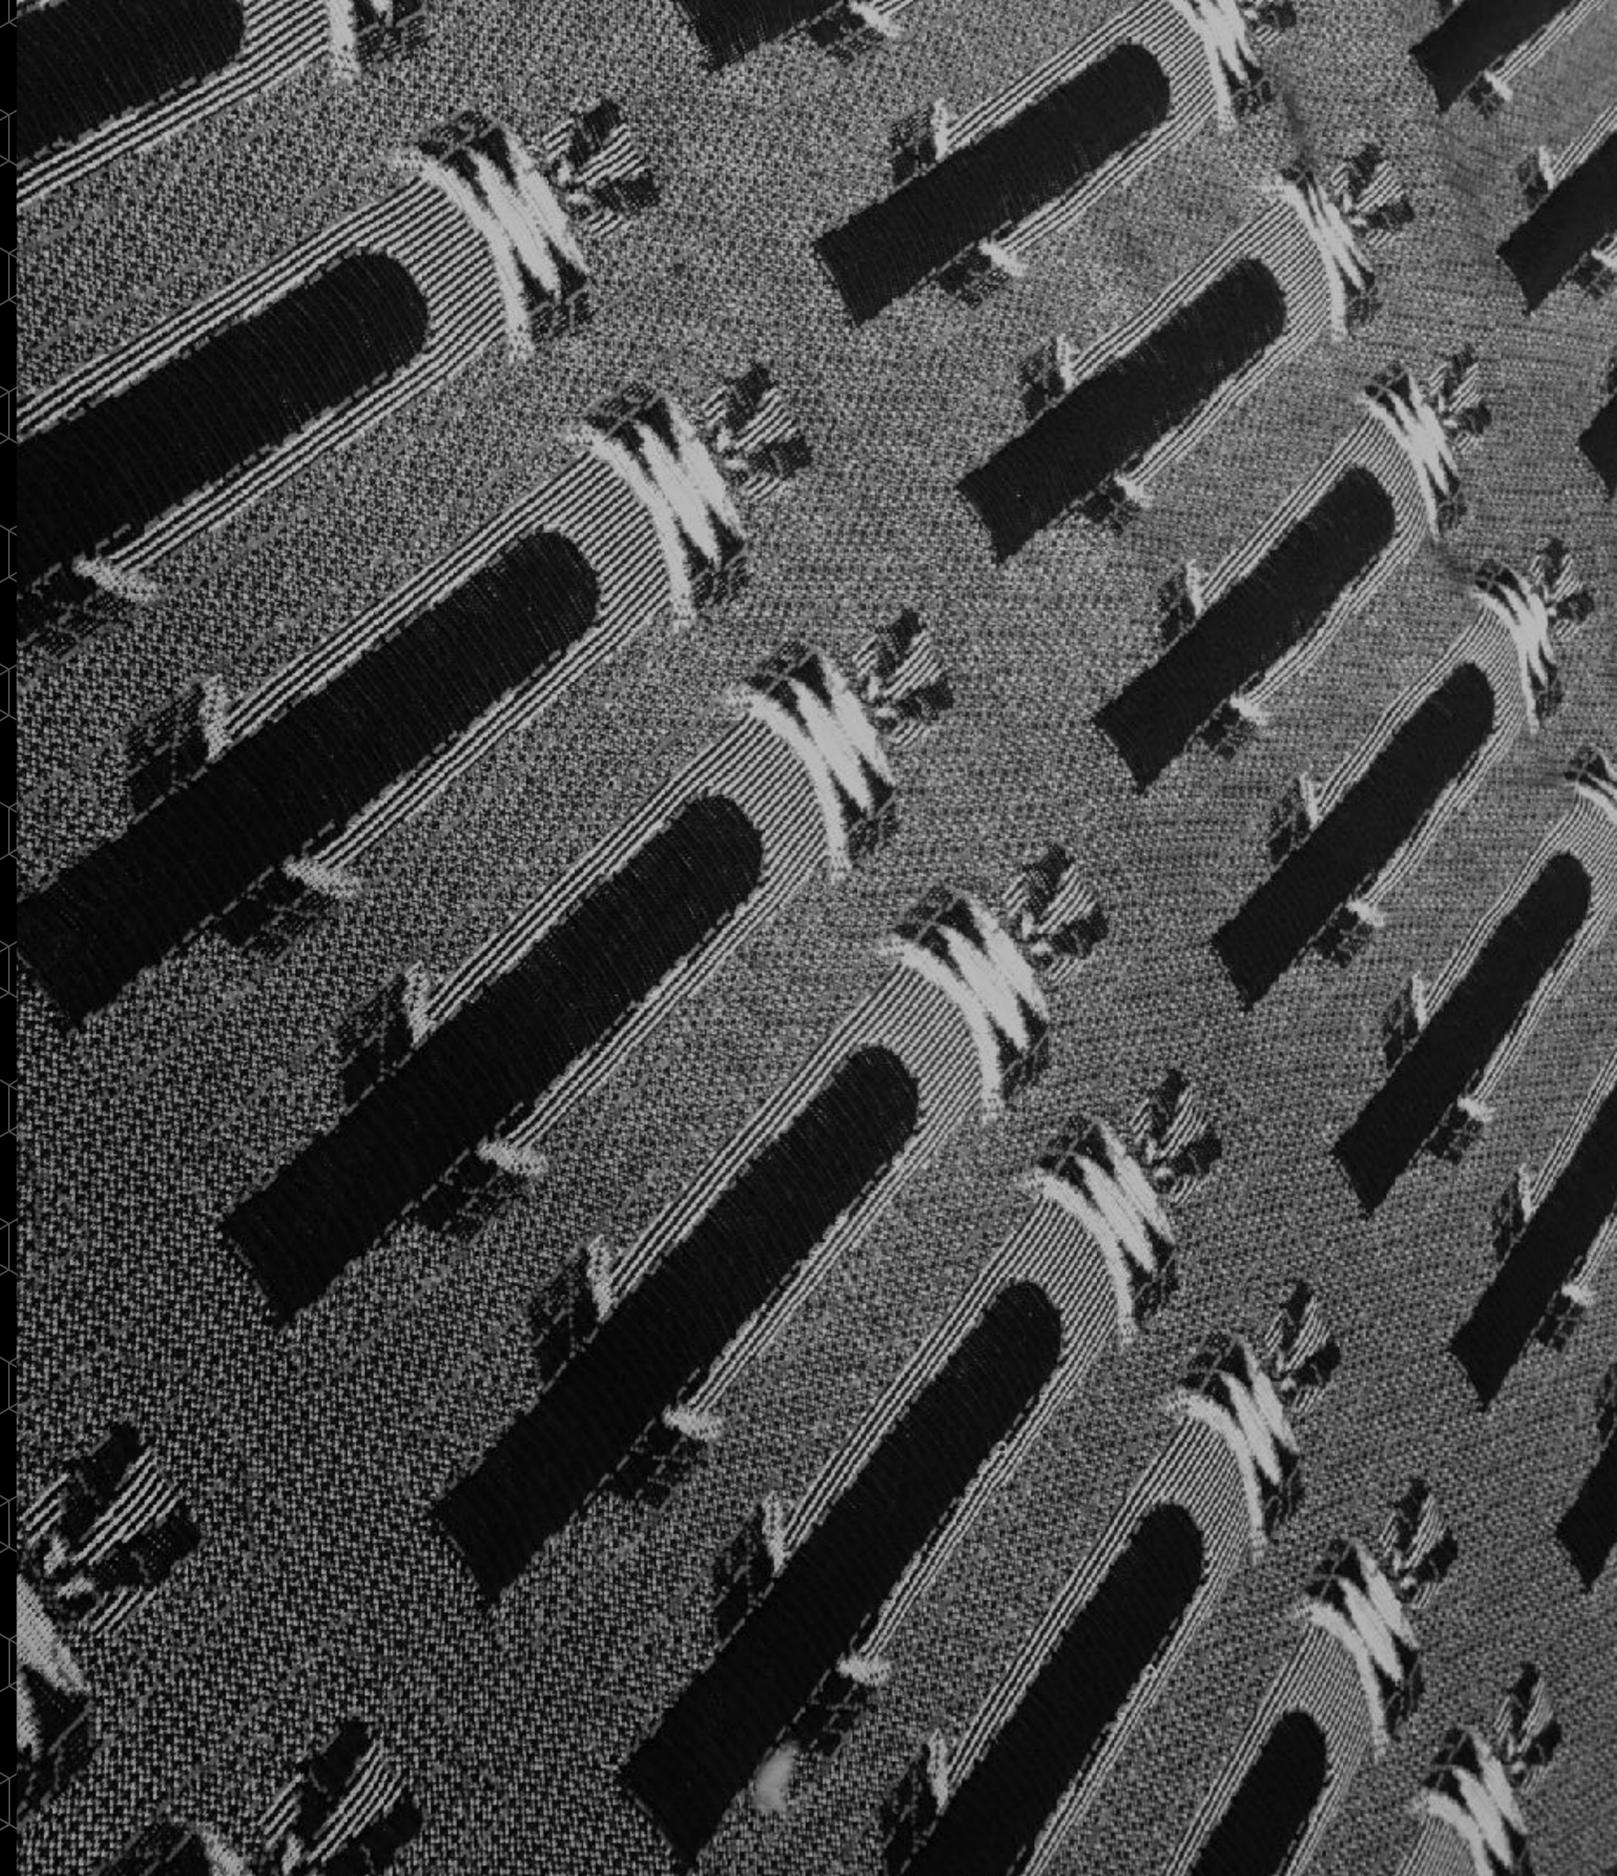

TI SensorTag CC2650

Programmable

Data: Temperature & Accelerometer

Period: 1.25 seconds

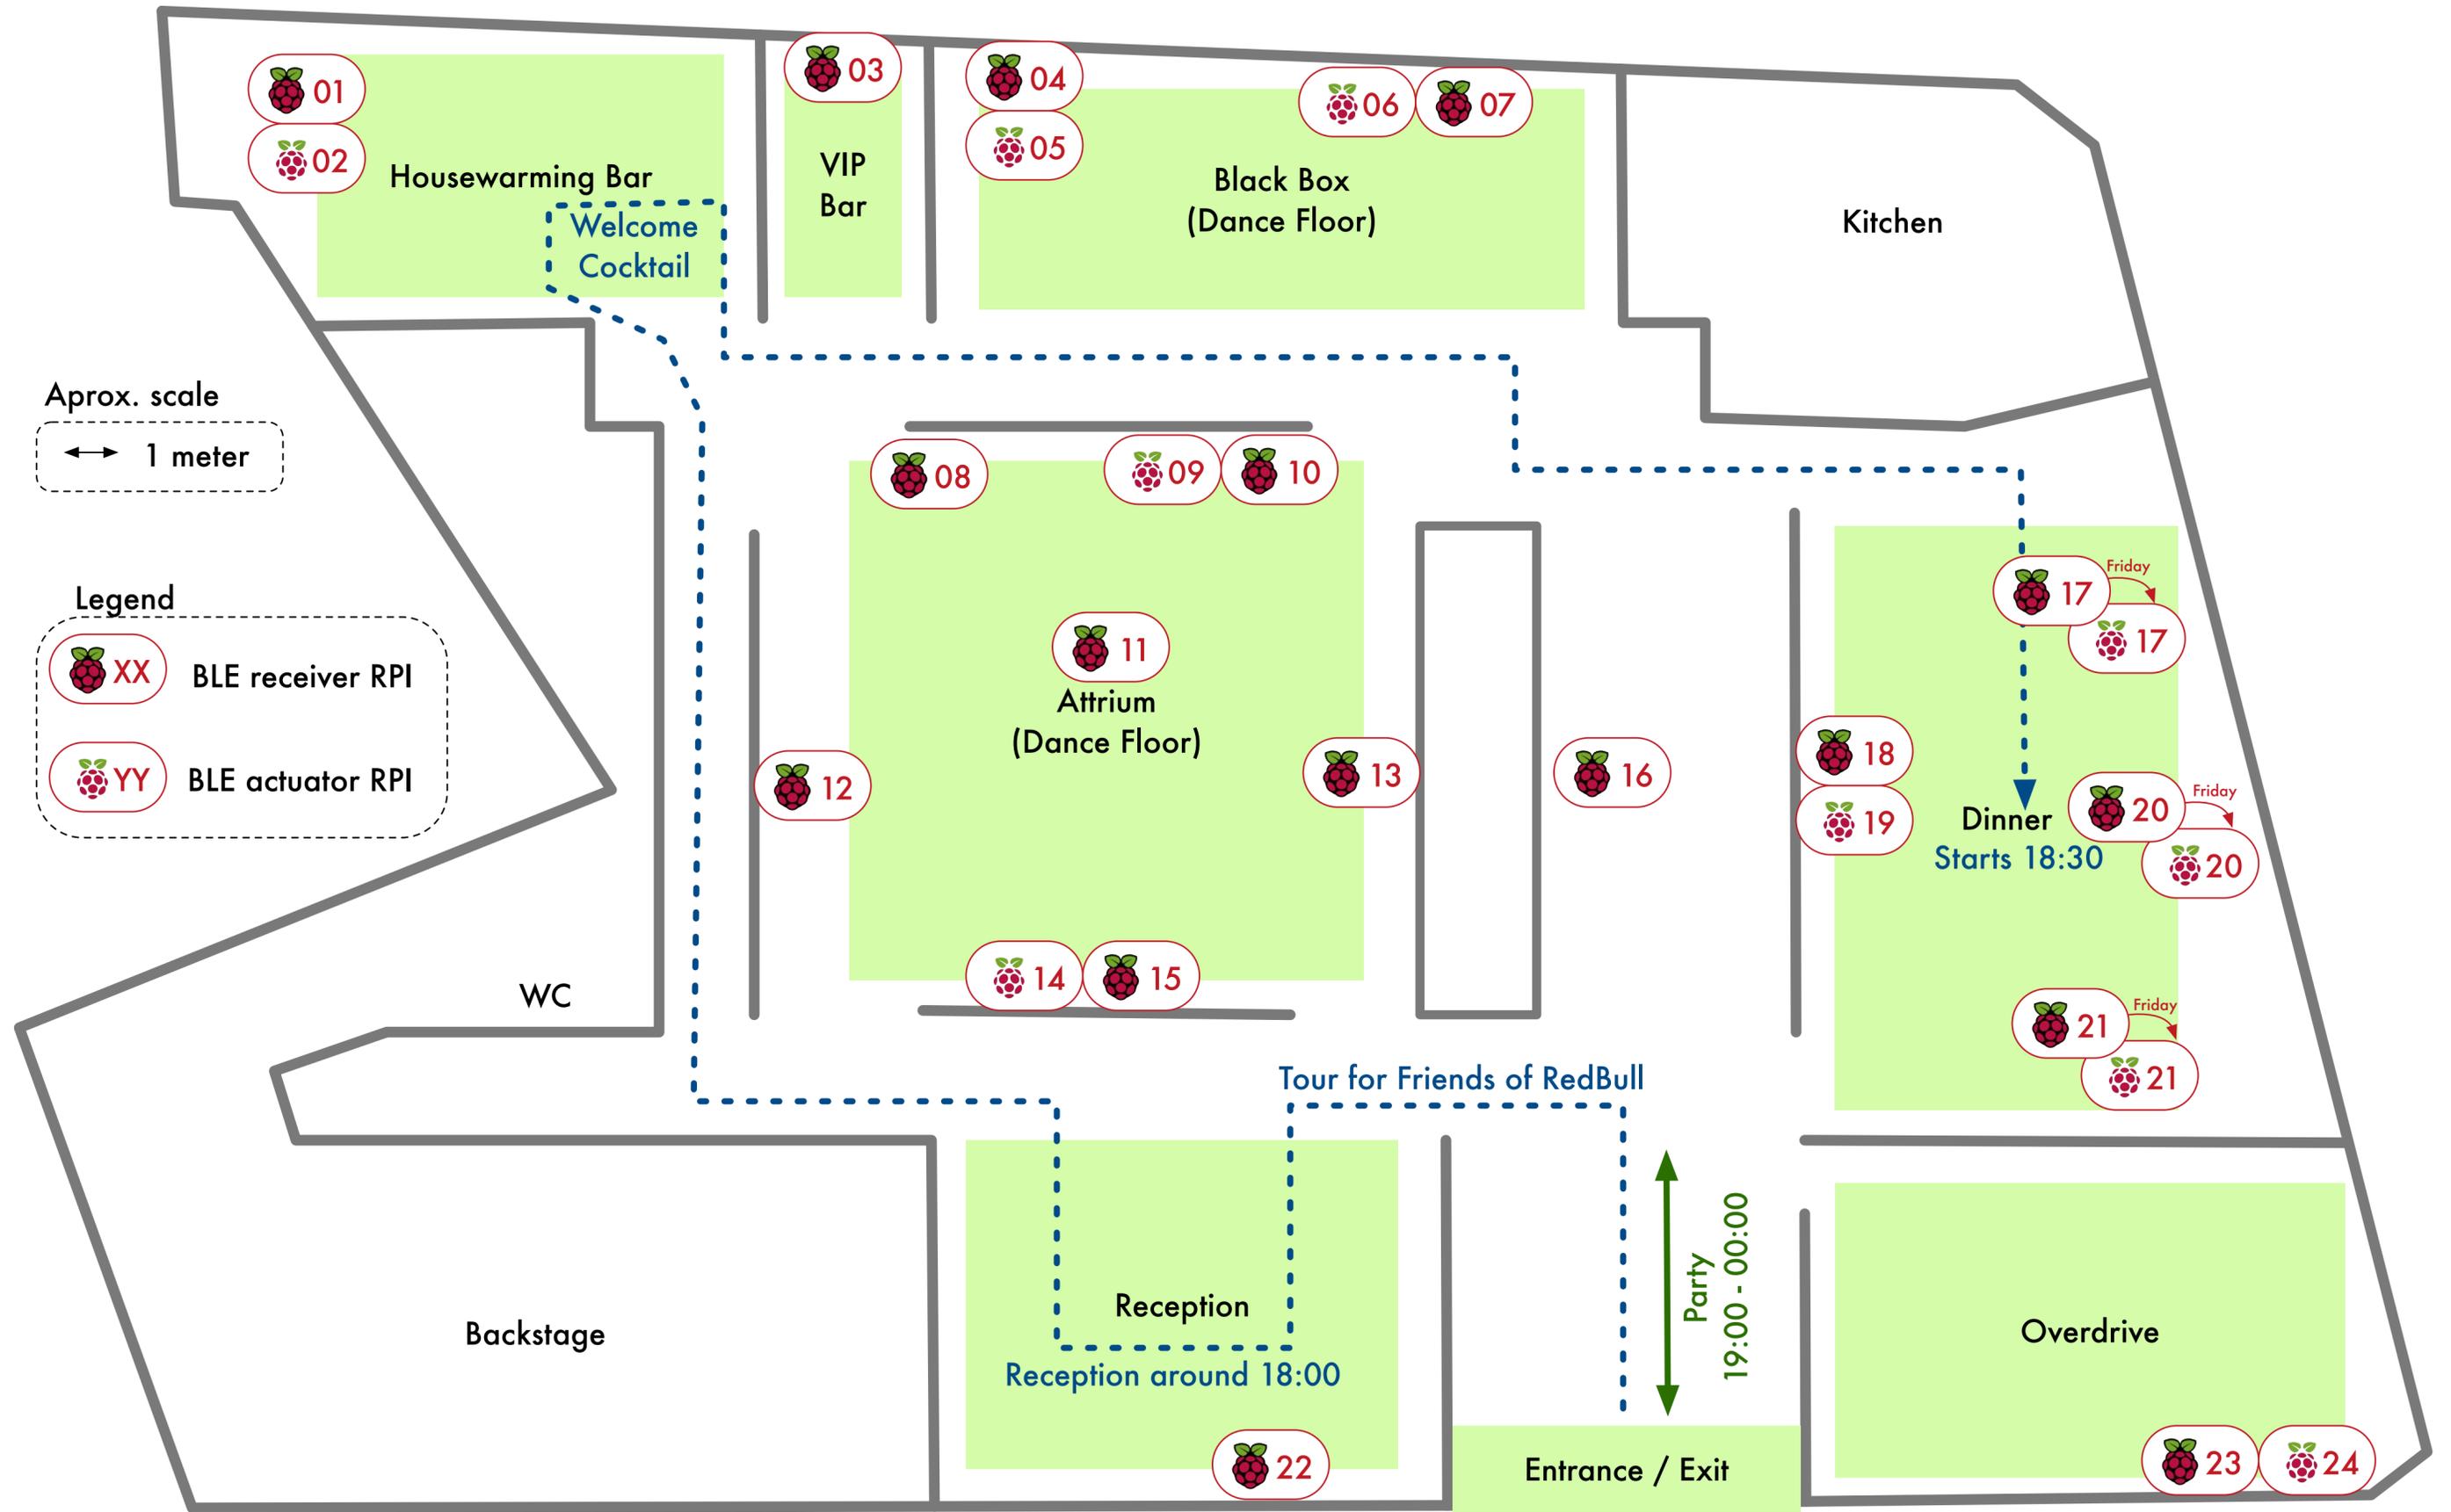

LED

HOW DO WE MAKE THE CLUB  
LISTEN TO THE CROWD?

# A NETWORK OF RPI

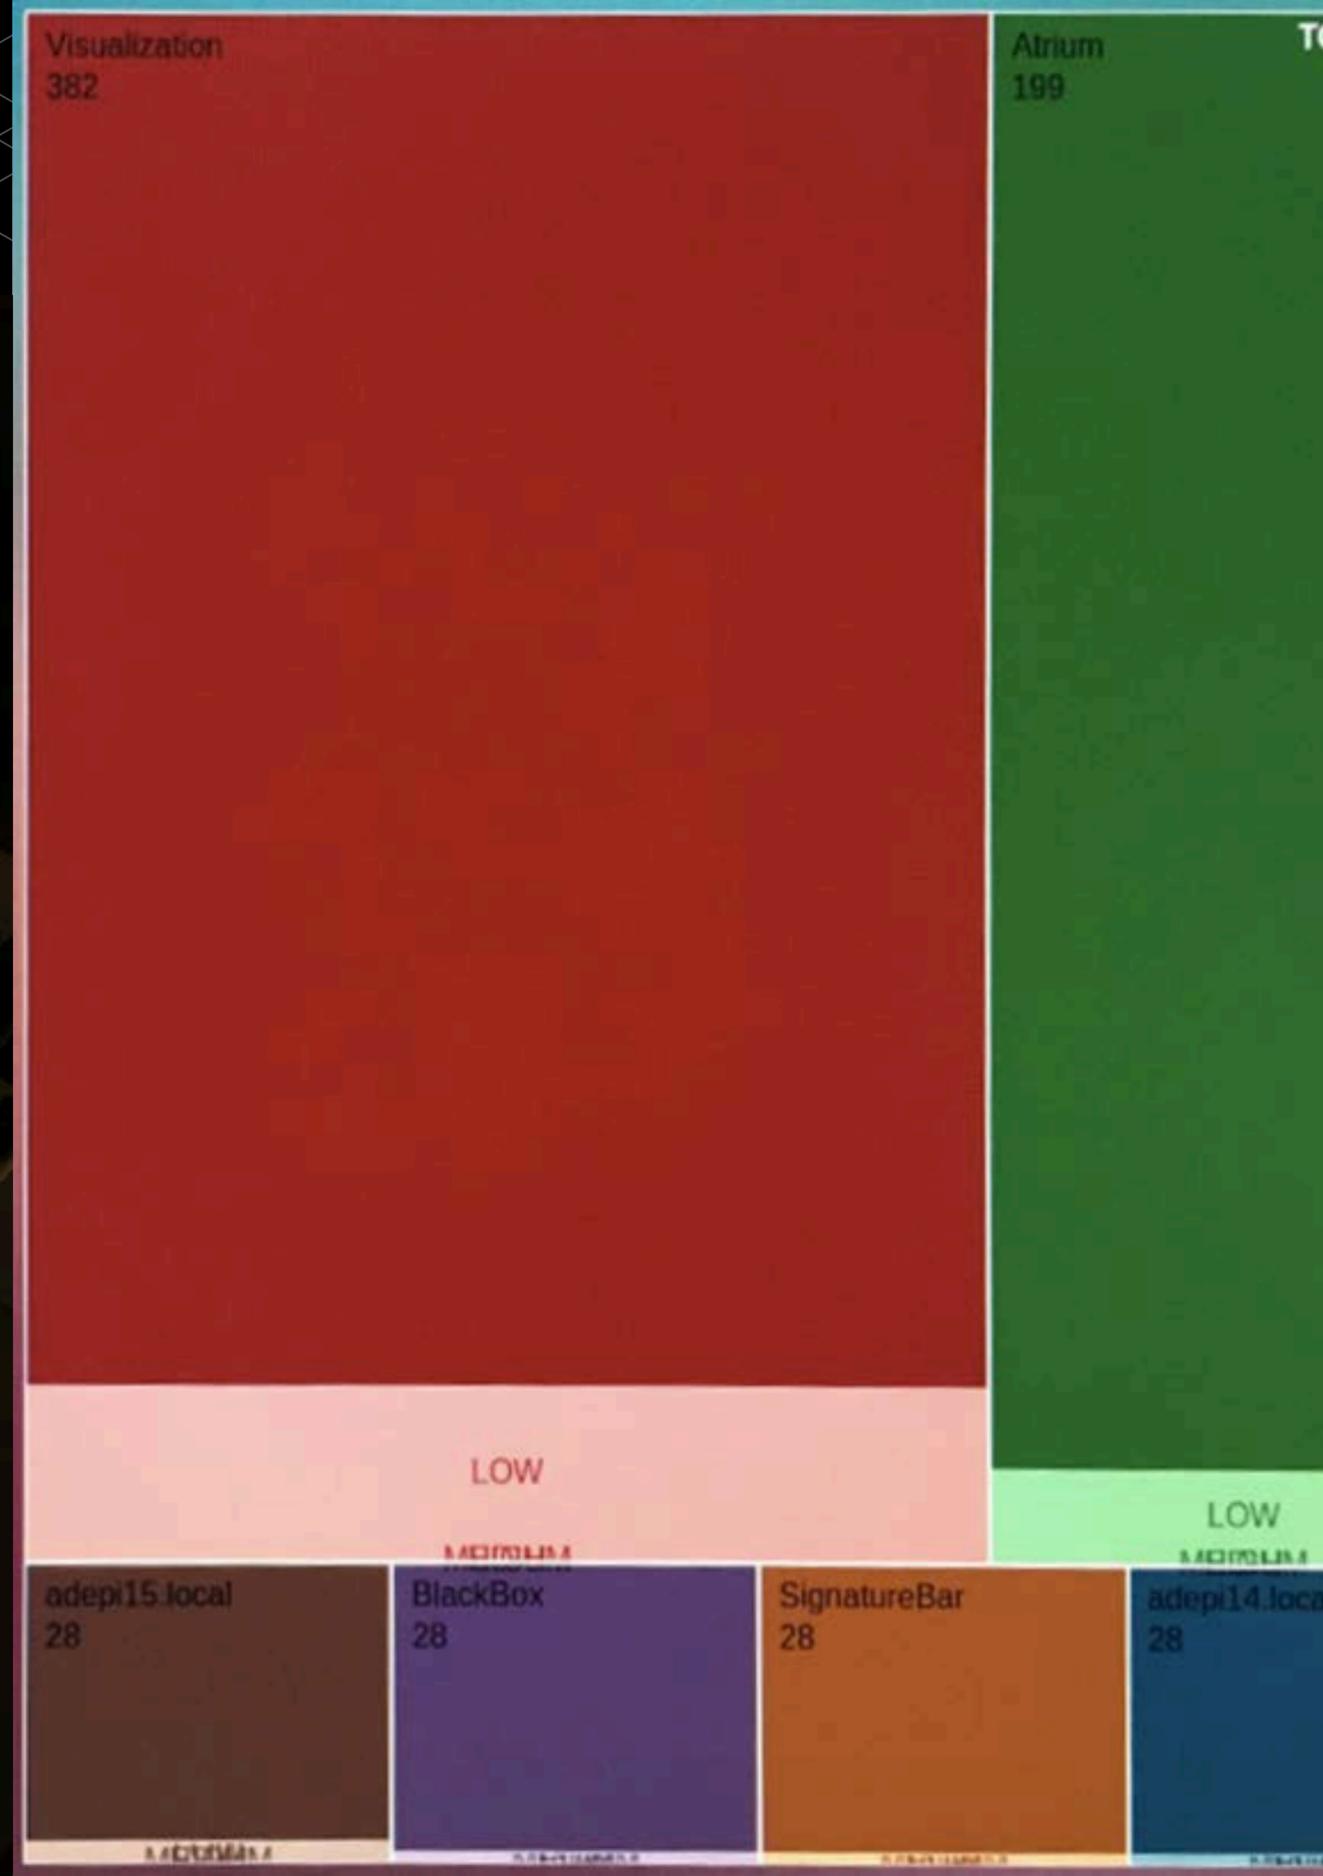

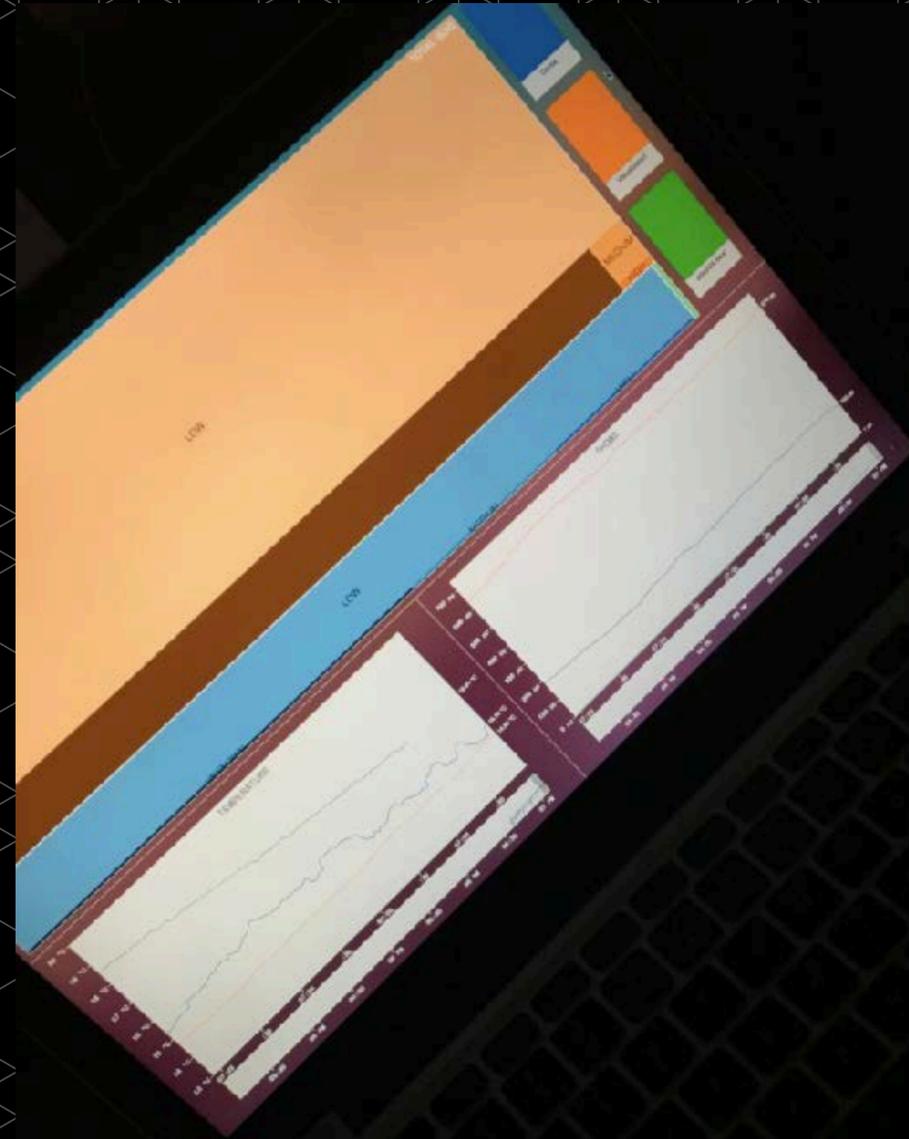

# FROM DATA TO INSIGHTS

# INDIVIDUAL & CROWD

- Temperature
- Location
- Energy level

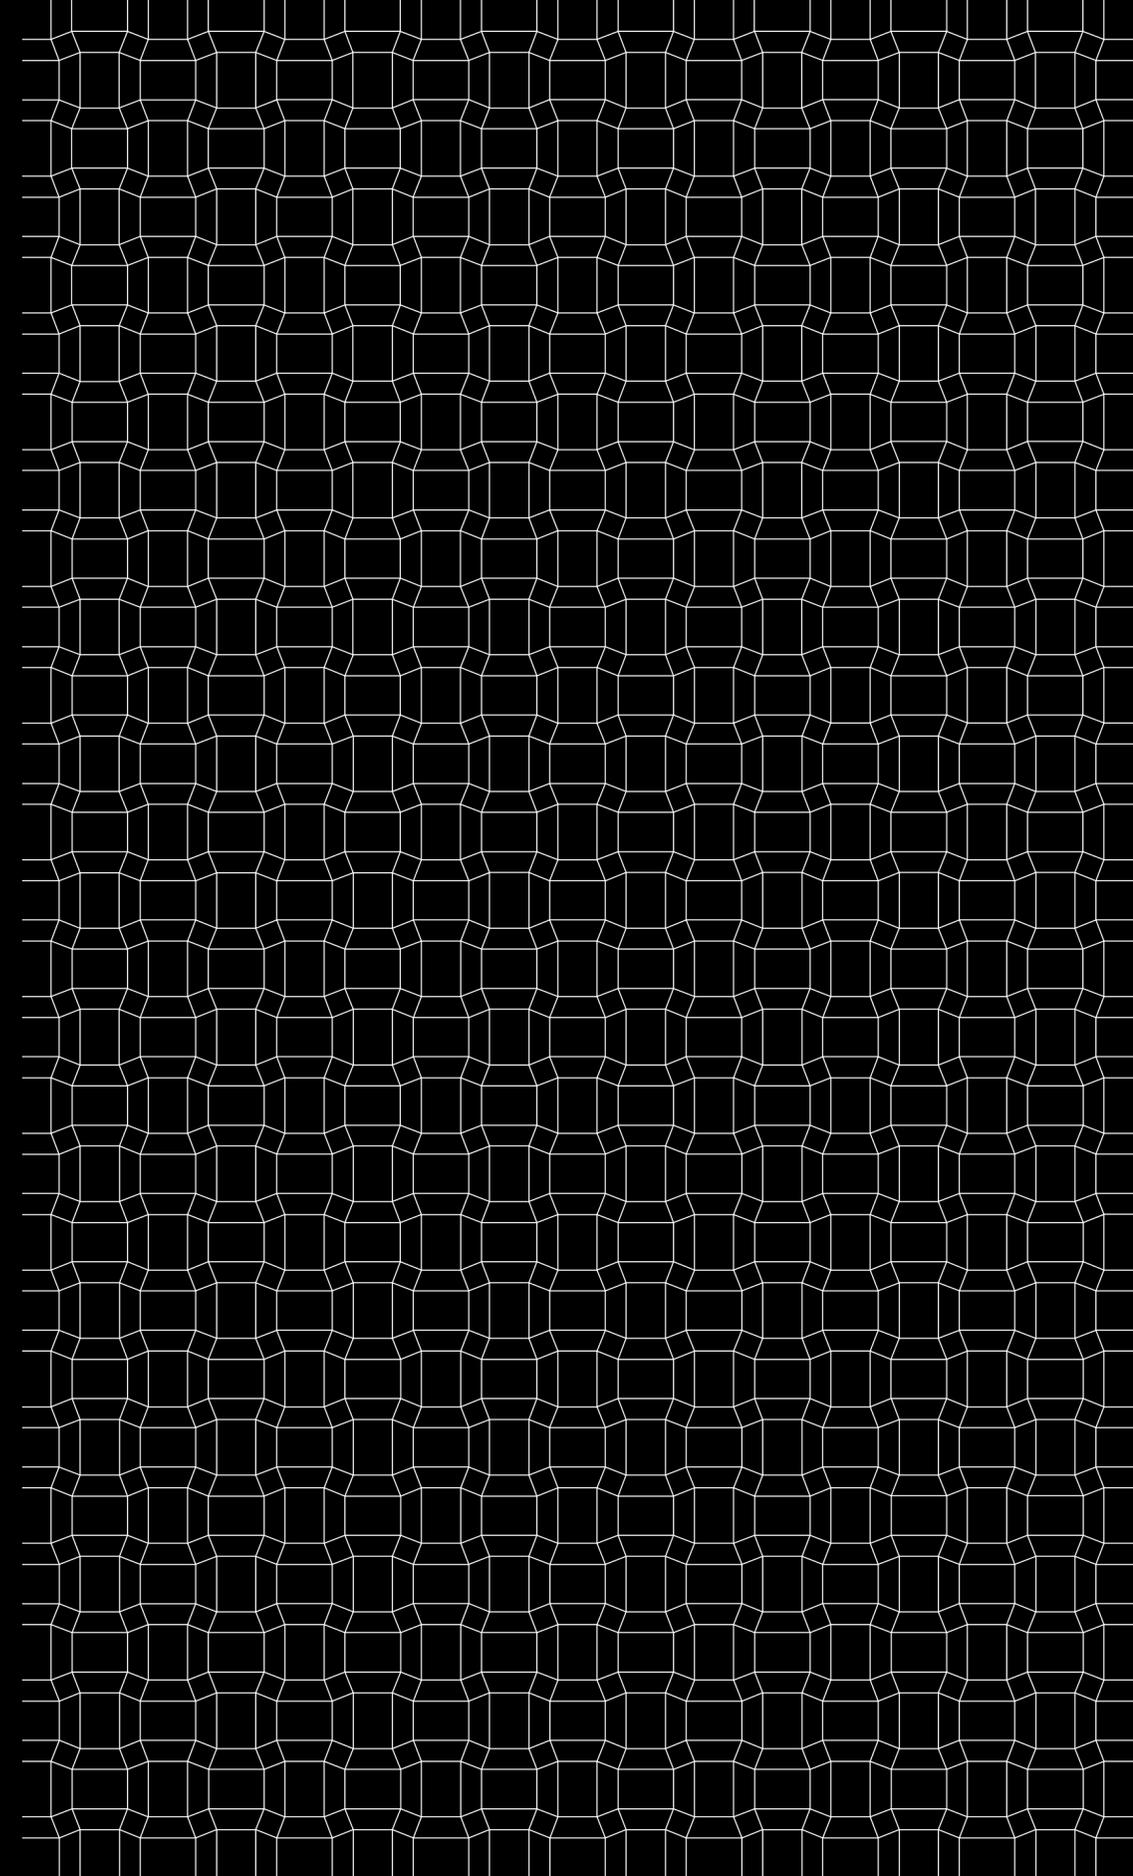

# ARE YOU DANCING?

- Dancing not an 'exercise' activity
- Sensors can go to sleep/low broadcast mode
- Broadcast rates of BLE beacons are between 0.4Hz–0.8Hz

Most activity recognition is done at  $> 30$  Hz

- Packet loss by function of BLE delivery

# SOLUTIONS

- Dancing not an 'exercise' activity
  - Sensors can go to sleep/low broadcast mode
  - Broadcast rates of BLE beacons are between 0.4Hz–0.8Hz
- Most activity recognition is done at  $> 30$  Hz
- Packet loss by function of BLE delivery
  - **First:** We collect some 'bootstrap' data

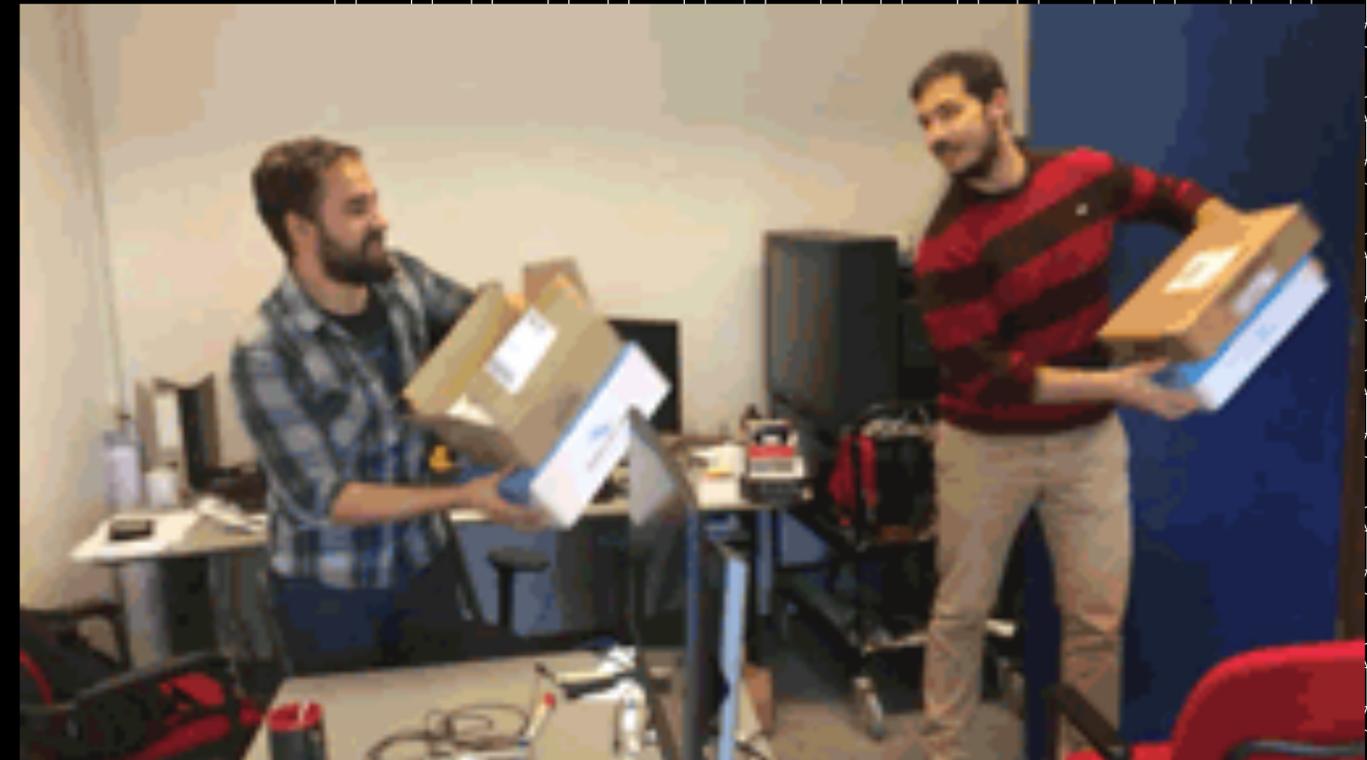

# SOLUTIONS

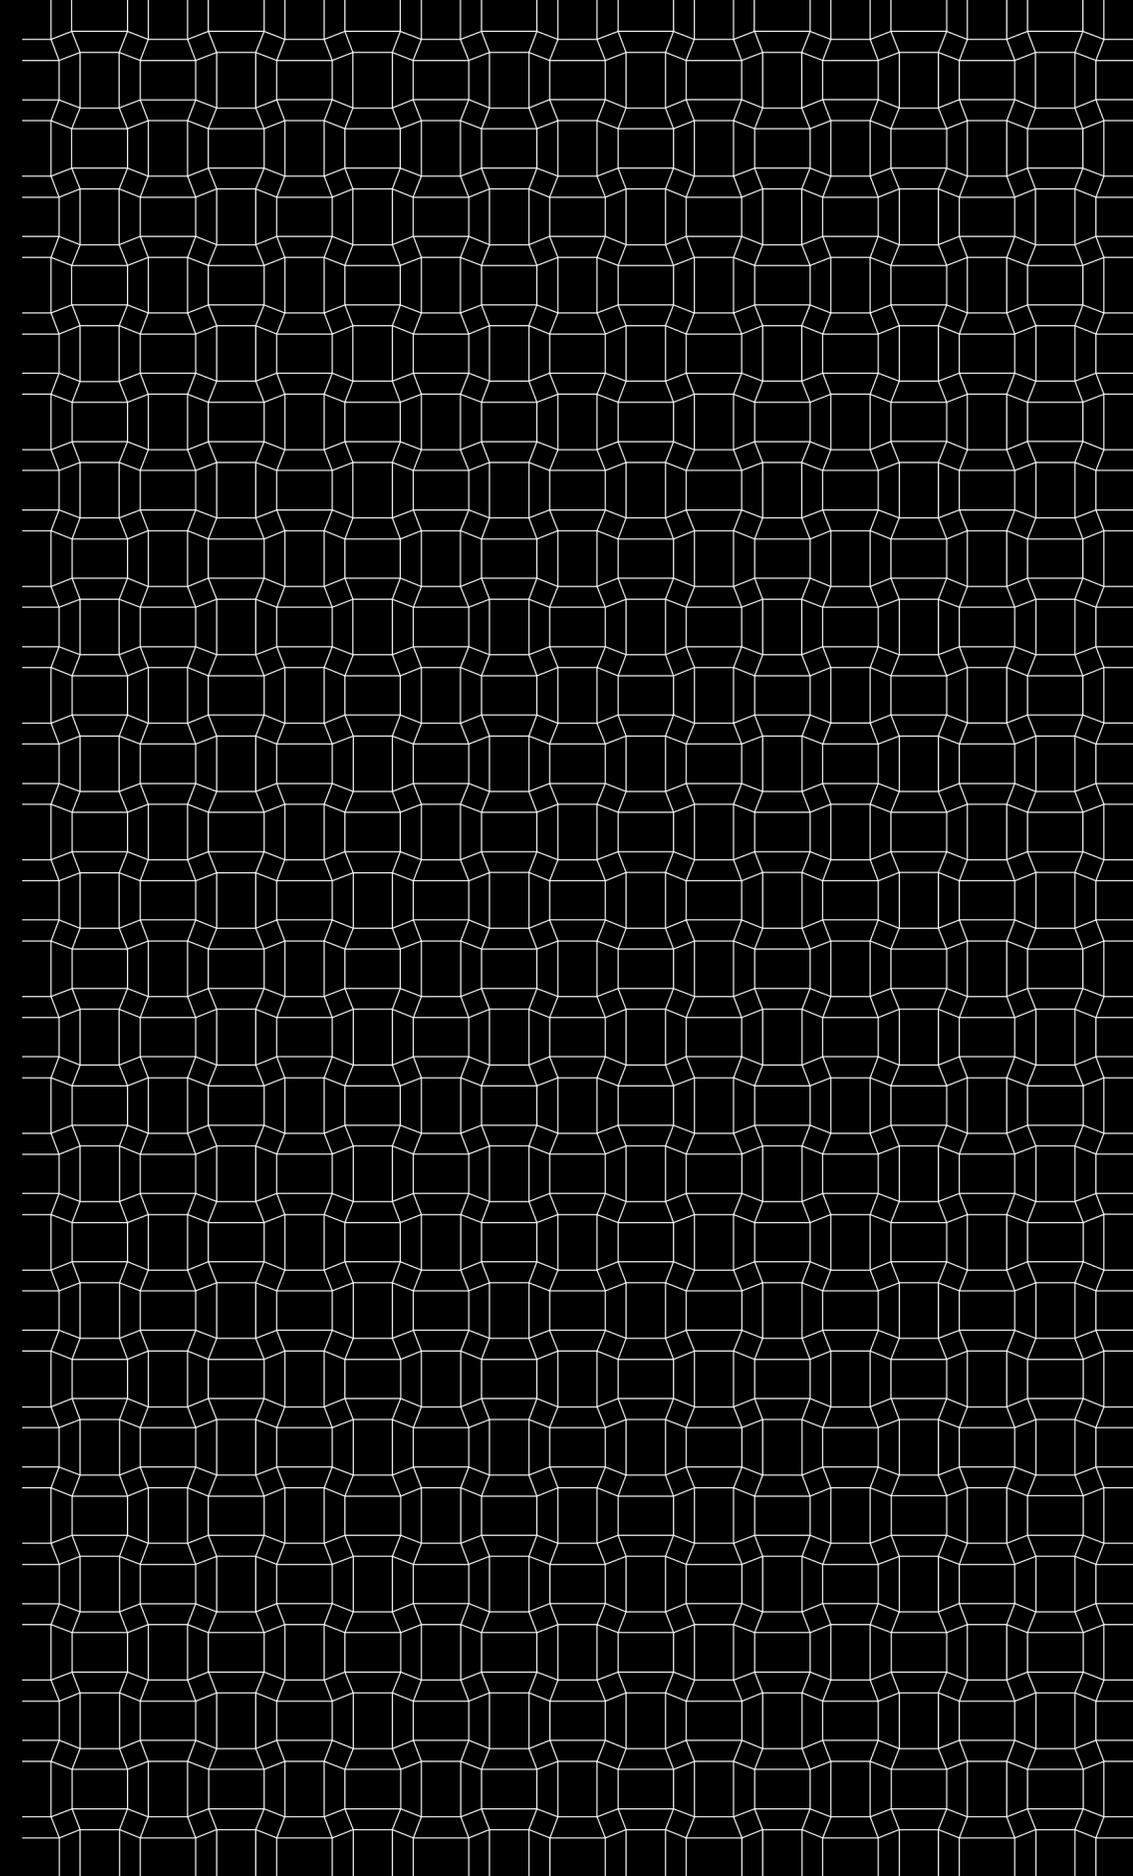

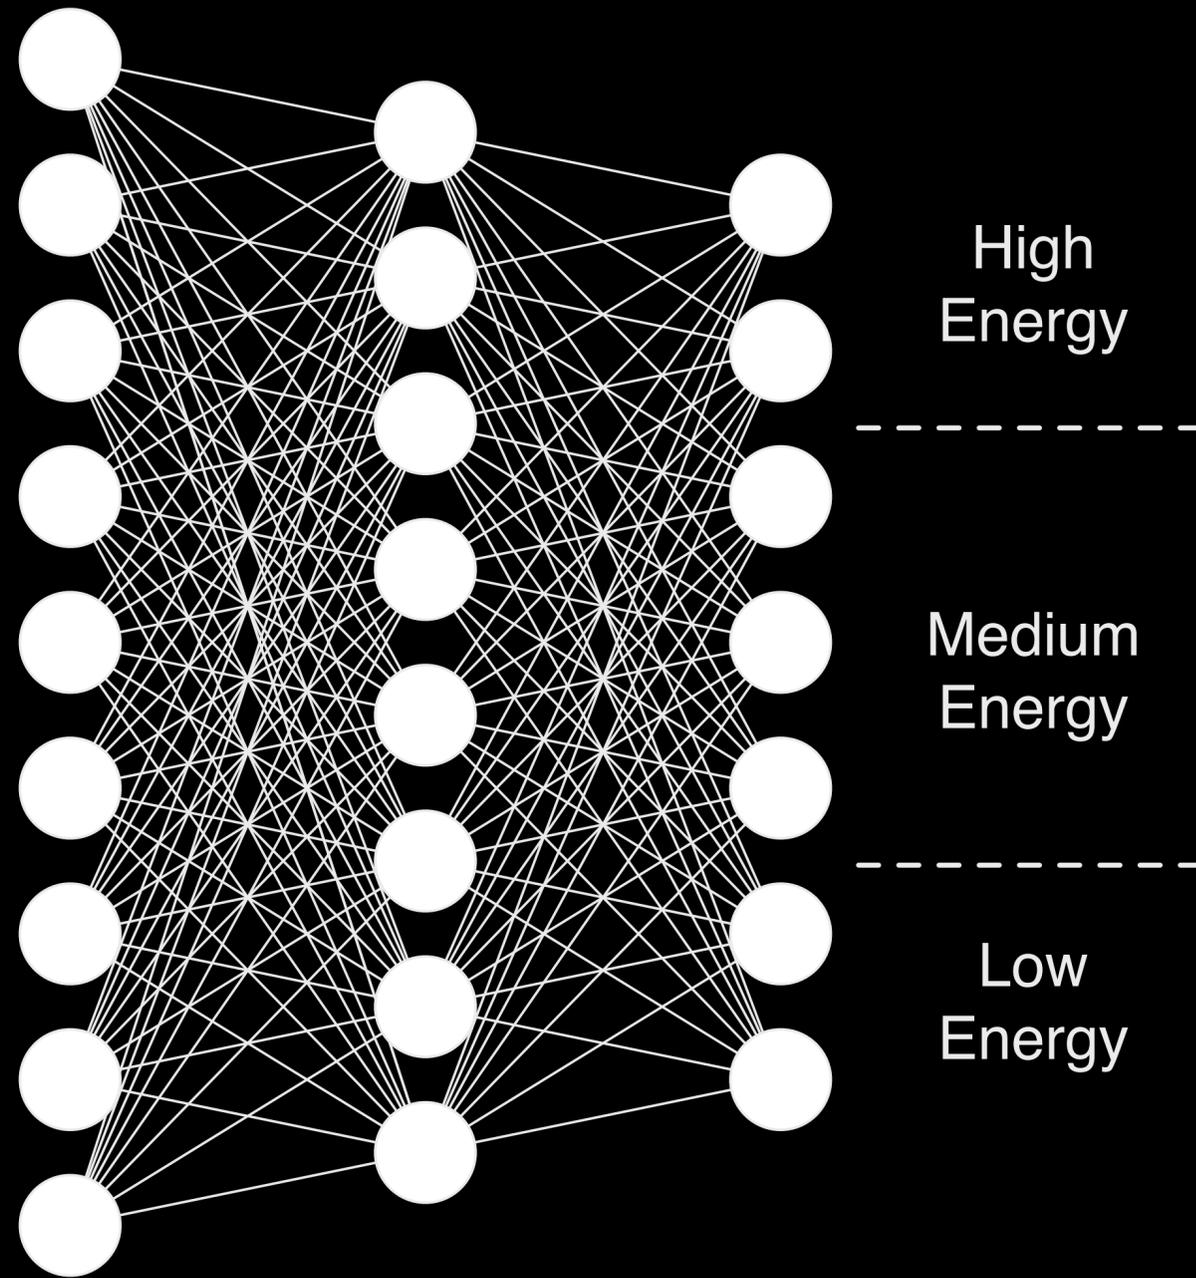

- Dancing not an 'exercise' activity
- Sensors can go to sleep/low broadcast mode
- Broadcast rates of BLE beacons are between 0.4Hz–0.8Hz

Most activity recognition is done at  $> 30$  Hz

- Packet loss by function of BLE delivery
- **First:** We collect some 'bootstrap' data
- **Second:** We measure expected packet loss

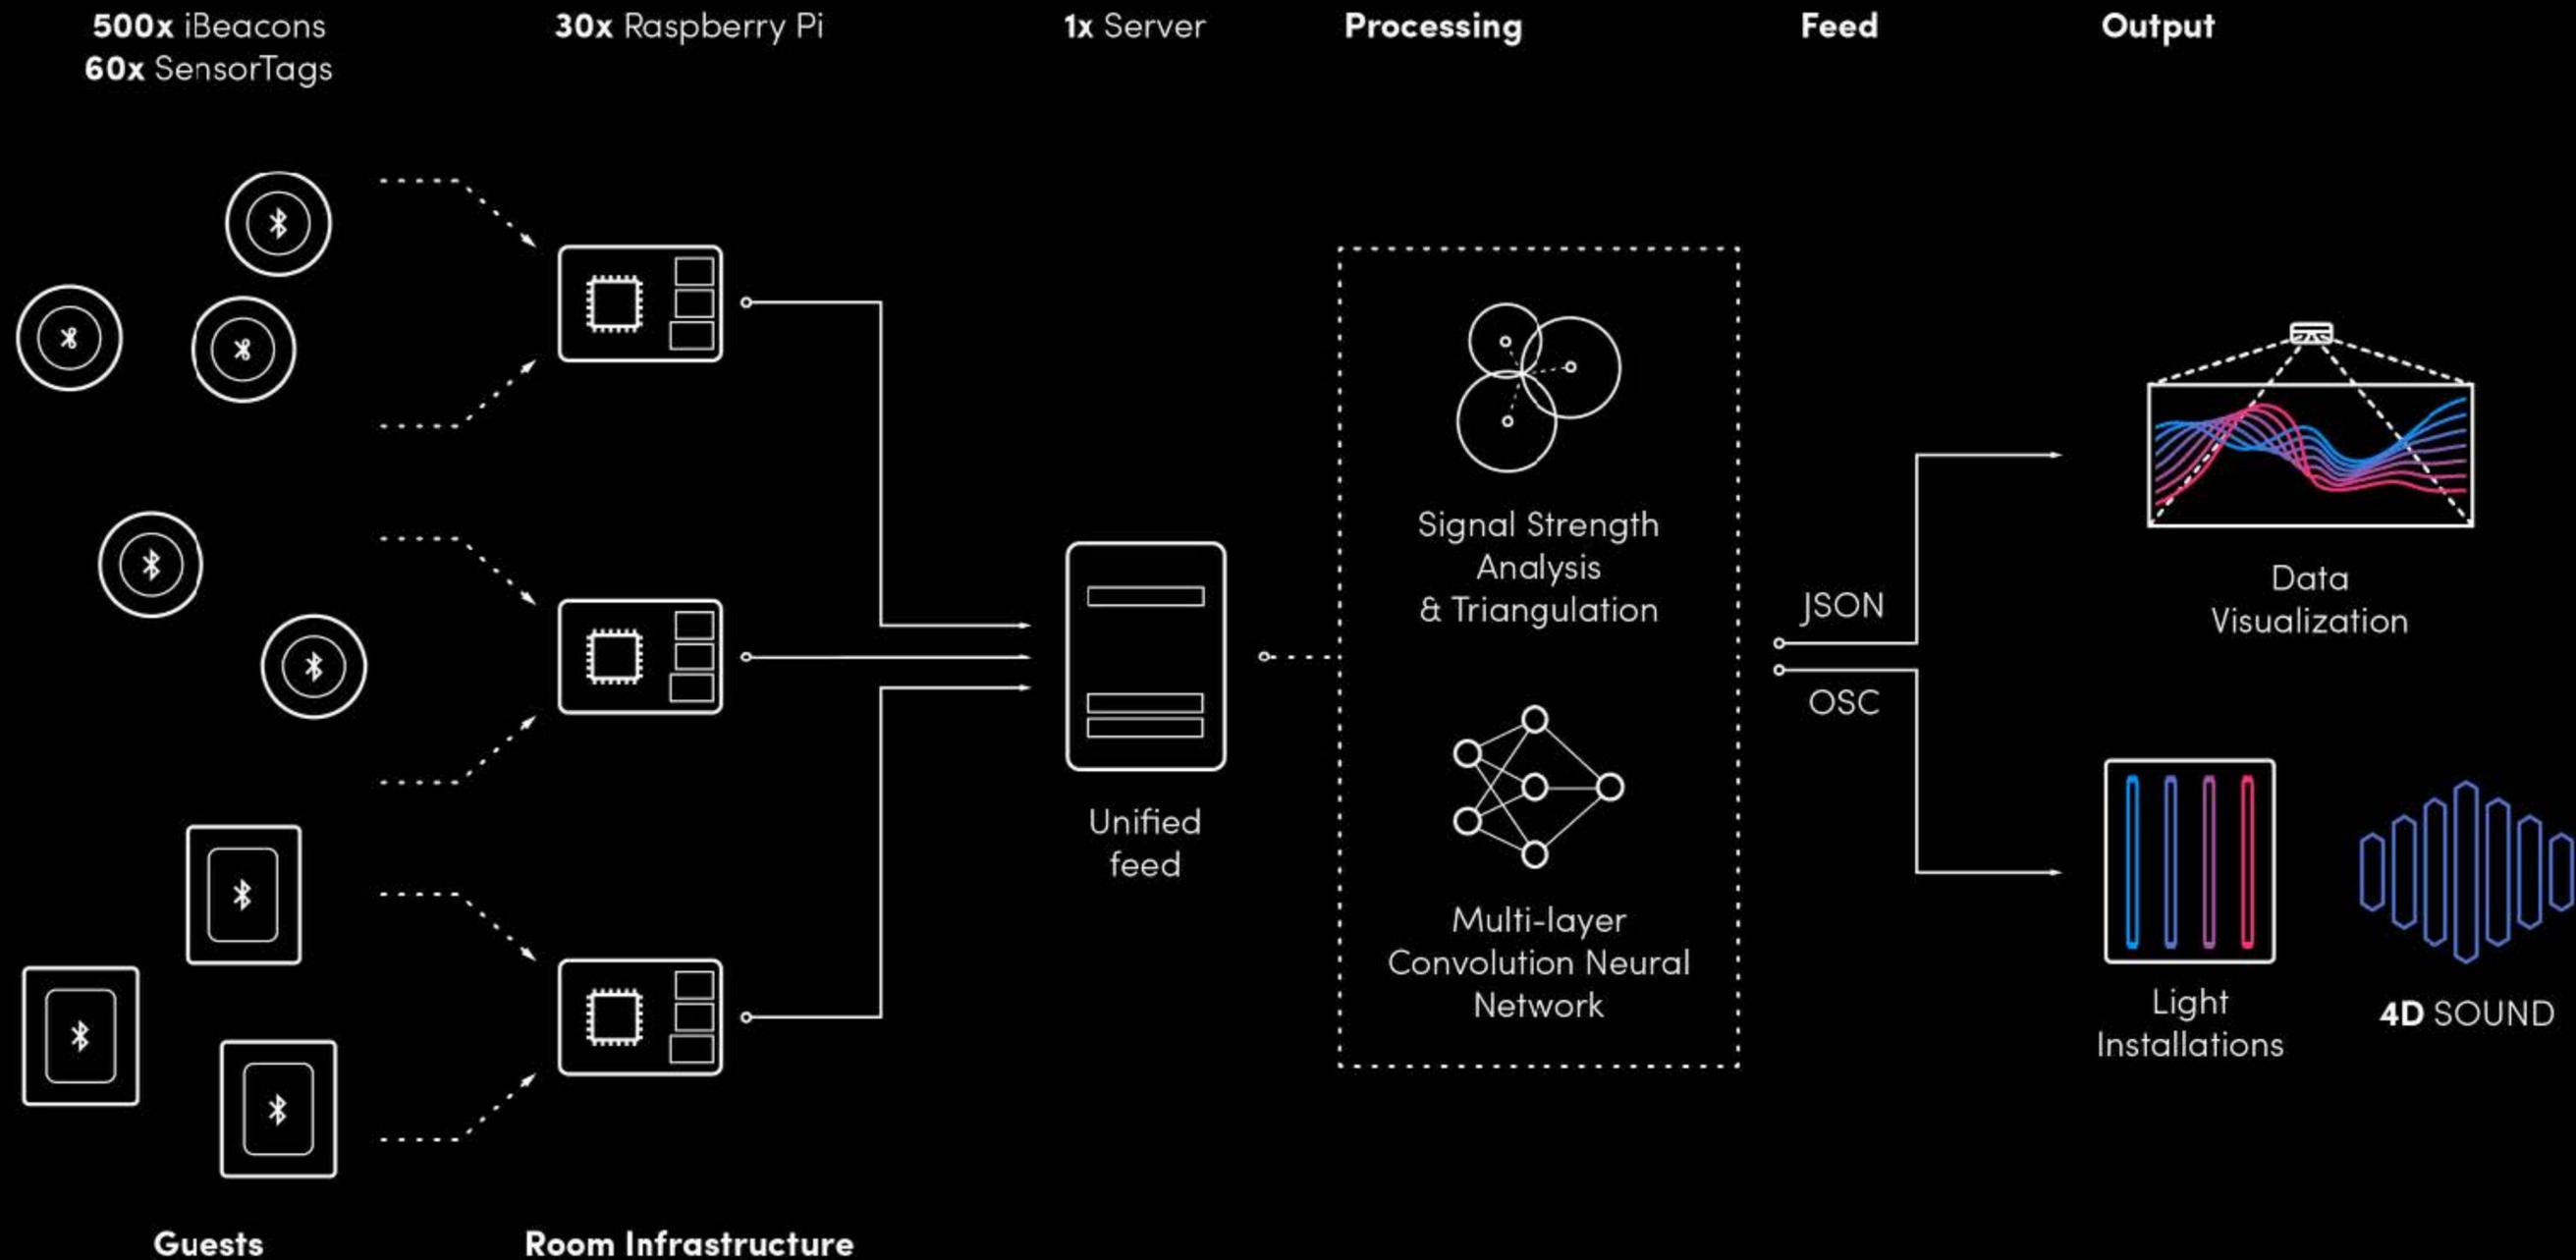

# NEURAL NETWORK

# DATA PIPELINE

Data collection, processing & interpretation

# AN OPEN DATASET

<https://github.com/cwi-dis/CWI-ADE2016-Dataset>

## 40M BLE PACKETS

- Timestamp
- Receiver (RPI)
- Address (hashed)
- Sensor Id
- Type of Device
- Payload (hashed)
- Payload Length

## 14M SENSOR READINGS

- Temperature
- Accelerometer (X, Y, Z)
- Is moving? (Estimate)
- Previous Motion State (Estimate)
- Current Motion State (Estimate)

# CREATING EXPERIENCES FROM DATA

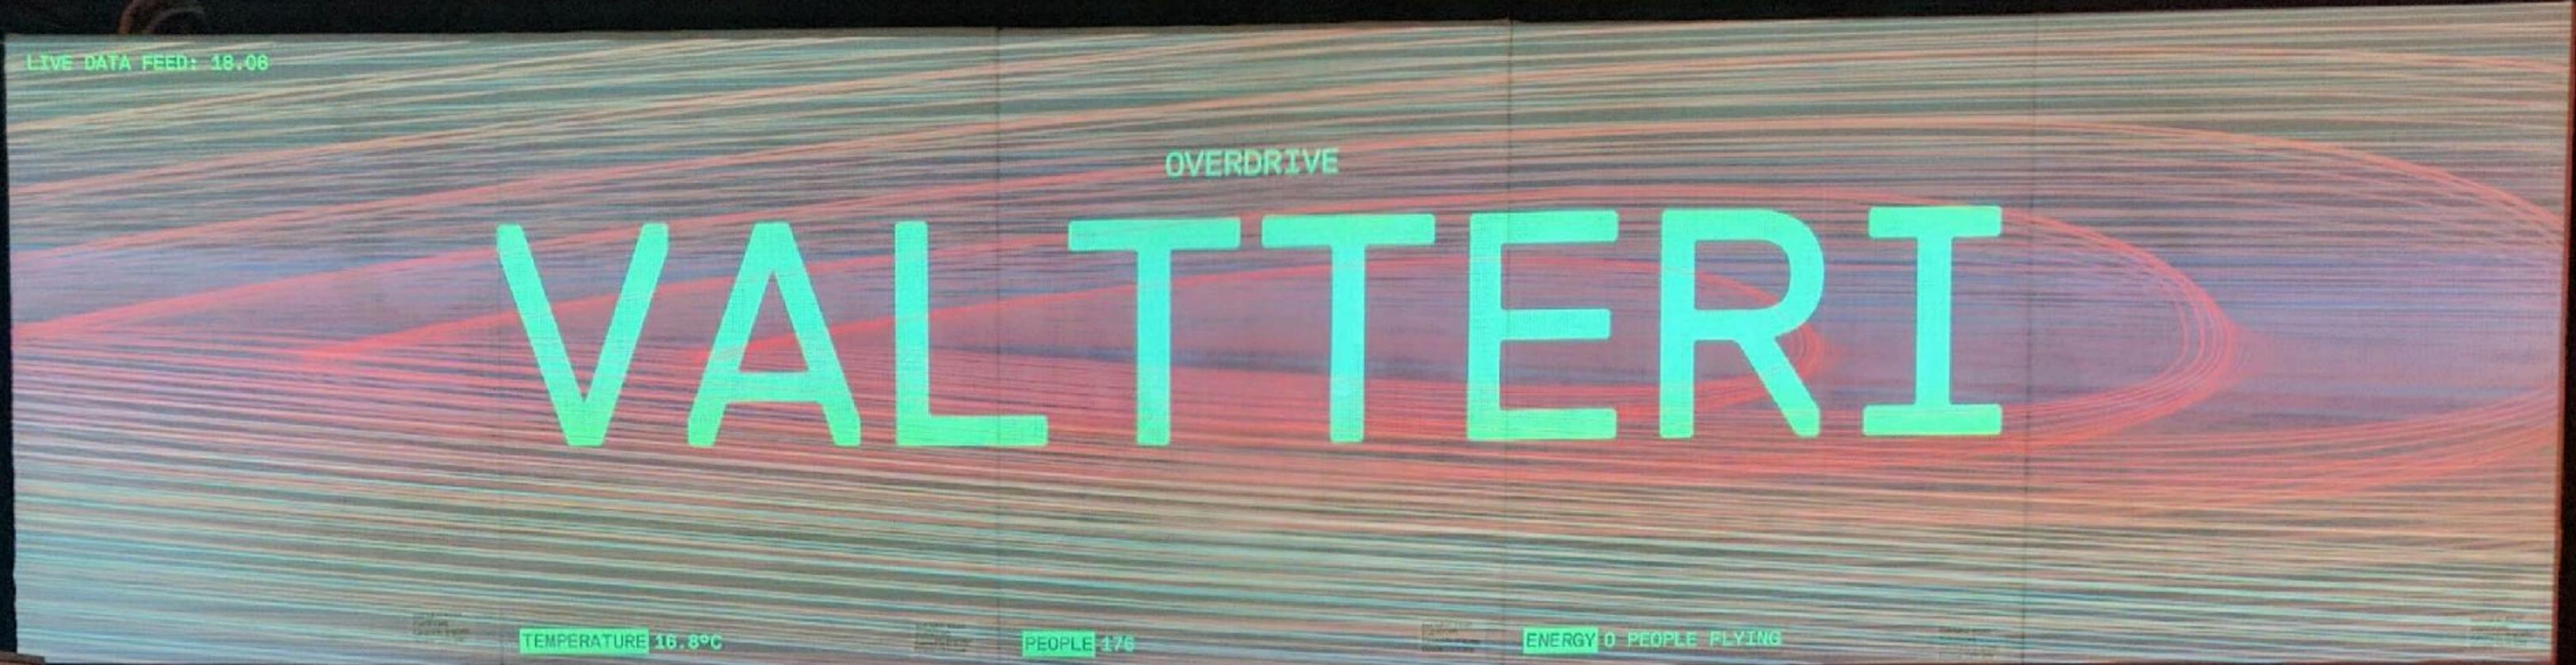

# FROM DATA TO SOUND

Giving the club a voice

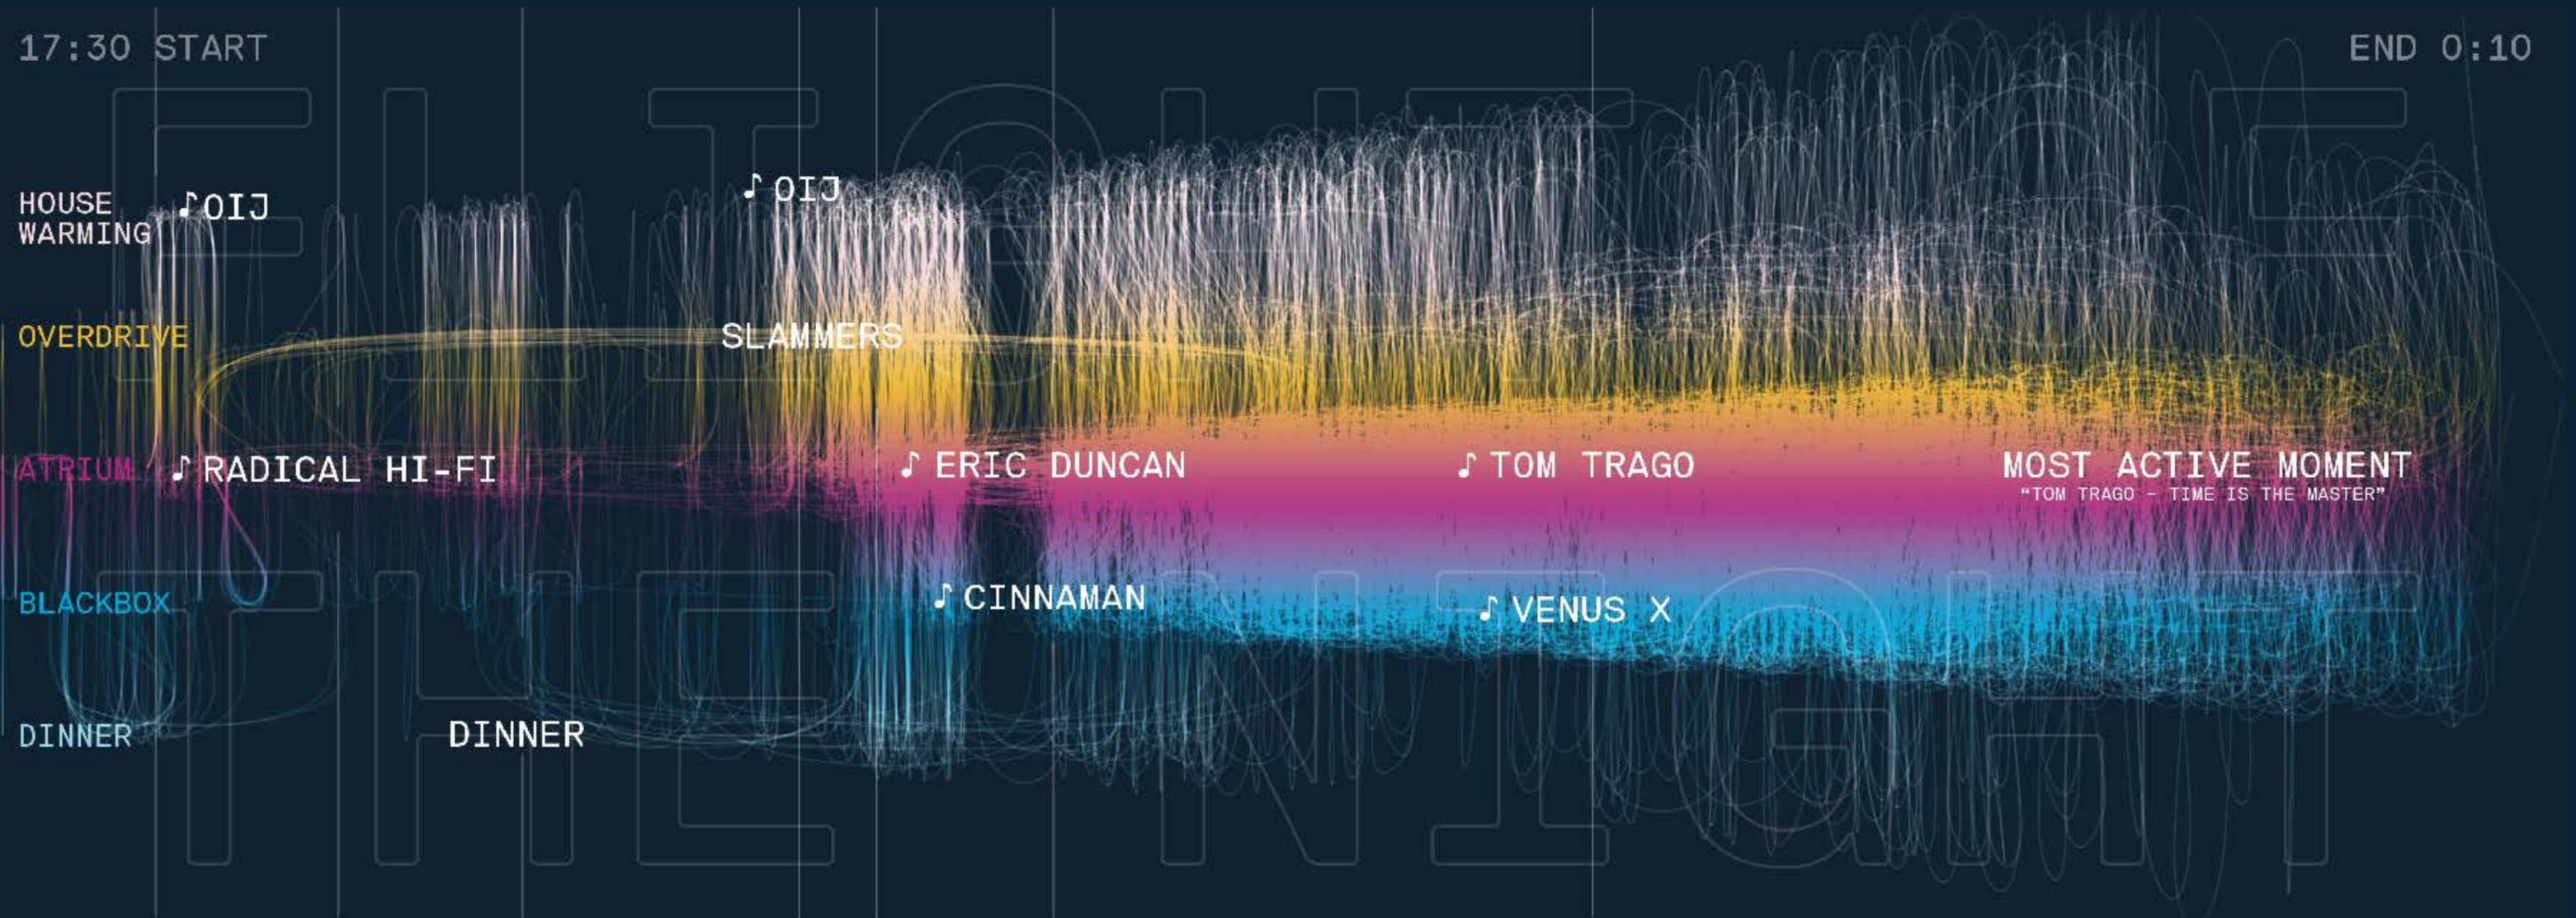

# ON-SITE LIVE VISUALIZATION

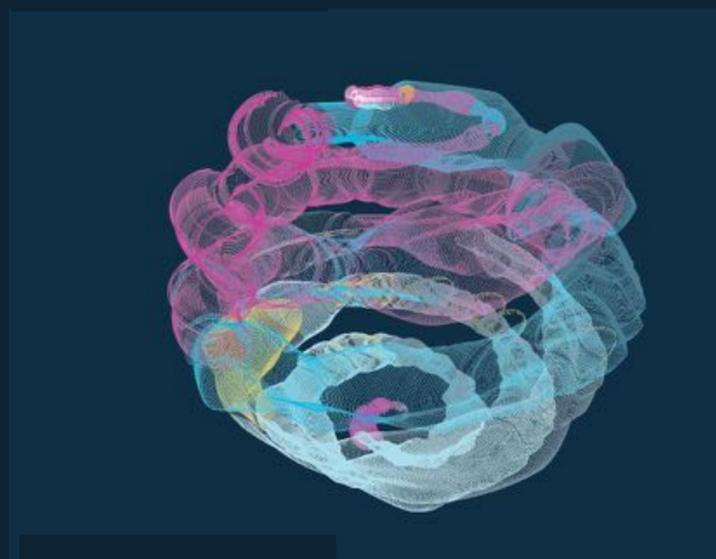

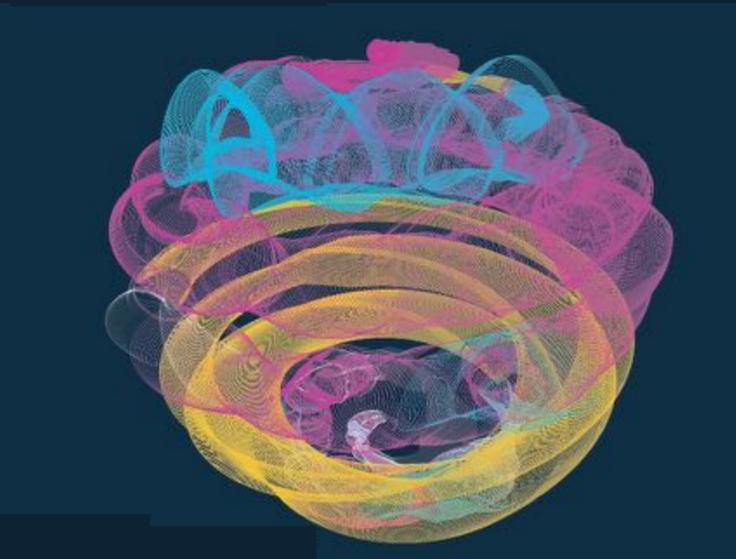

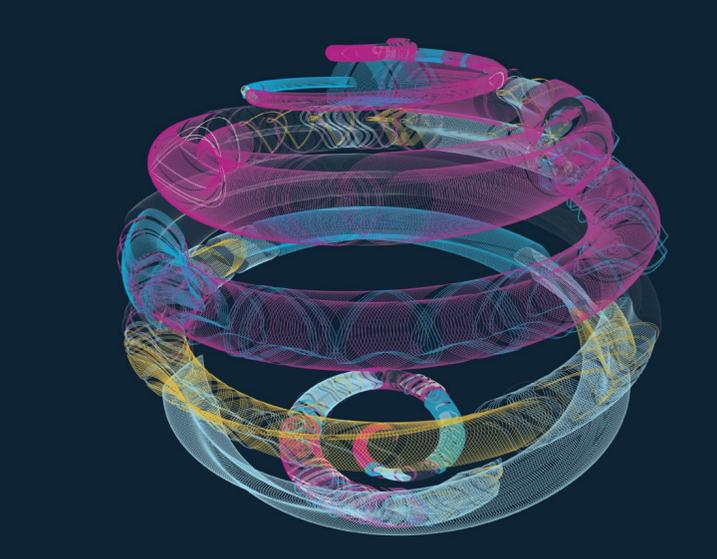

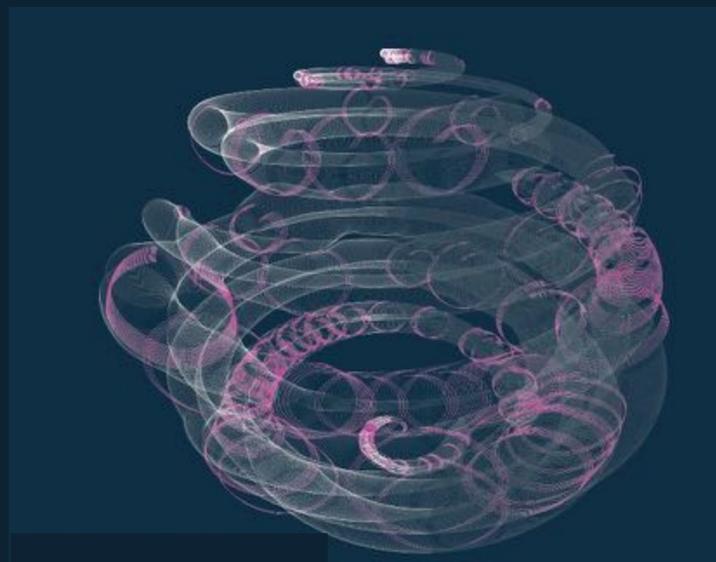

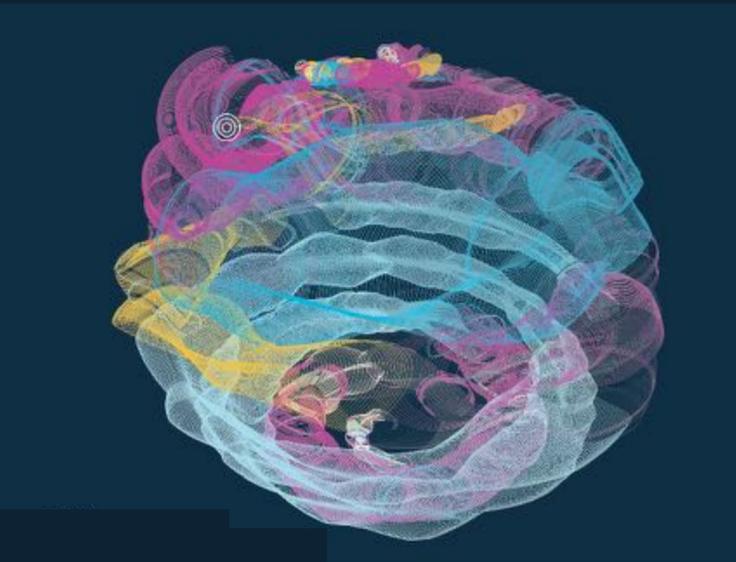

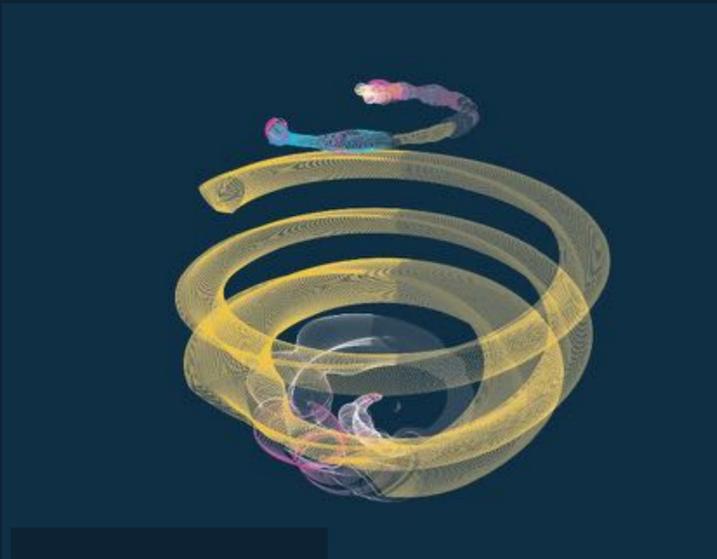

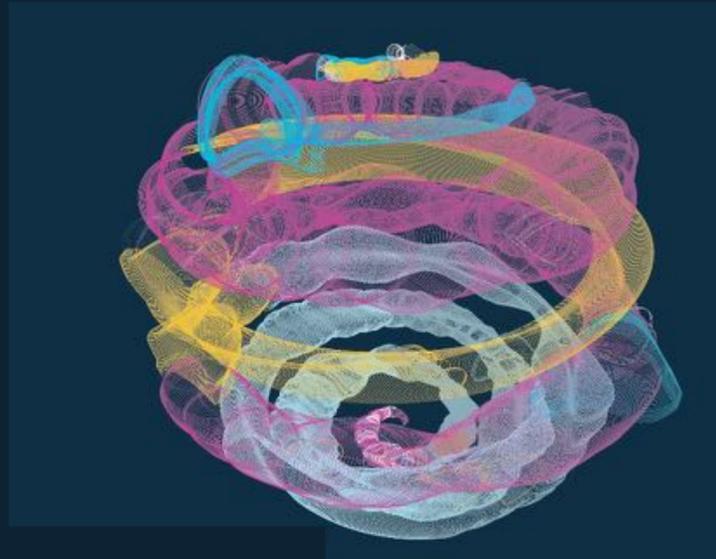

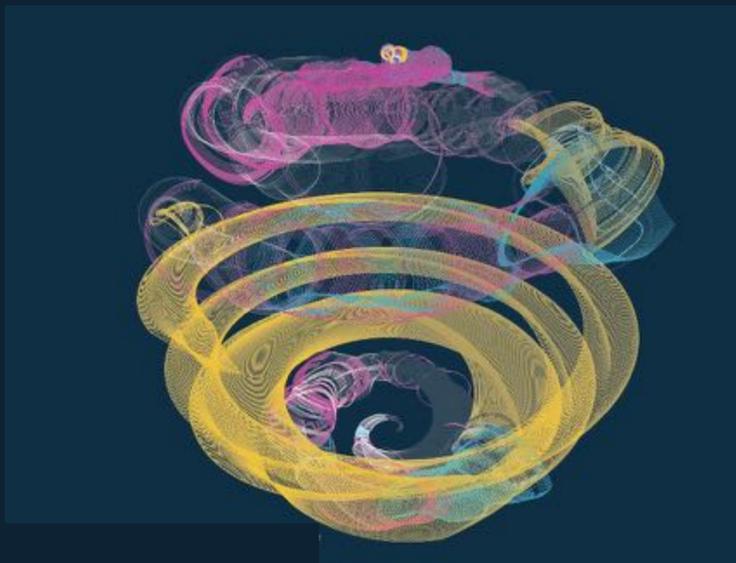

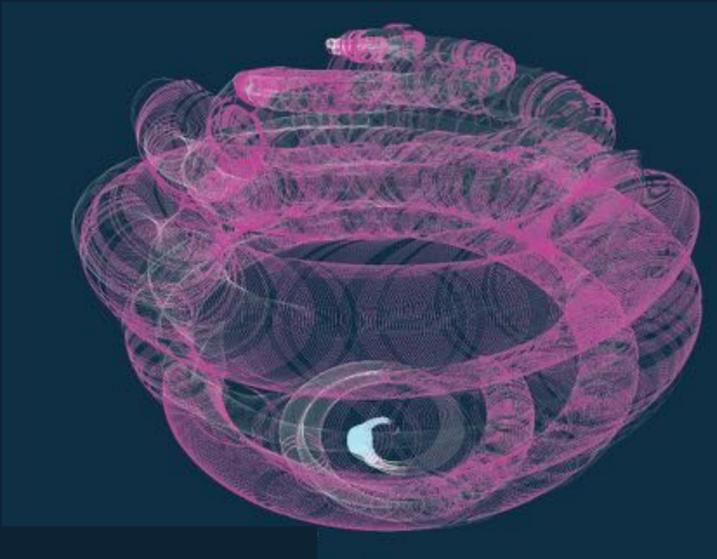

Creating Meaningful Data Summaries

# VISUAL EXPERIENCE SUMMARY

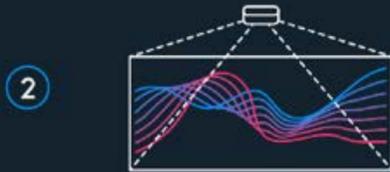

Guest > Data > Club Energy > Flight of the Night

# PERSONALISED SCARF

Club Energy > Data Visualisation > Pixel to Needle > Scarf

# WHAT NOW?

# Project Cairo

## An intelligent soft-robotic jacket

Video: <https://www.youtube.com/watch?v=maKILHxcGAE>

# DATA

- User profile
- Internal sensors
- External sensors (e.g. in the bike)
- Other data sources (e.g. weather)

# REACTIVE

- Soft-robots / origami

# PERSONALISED & INTELLIGENT

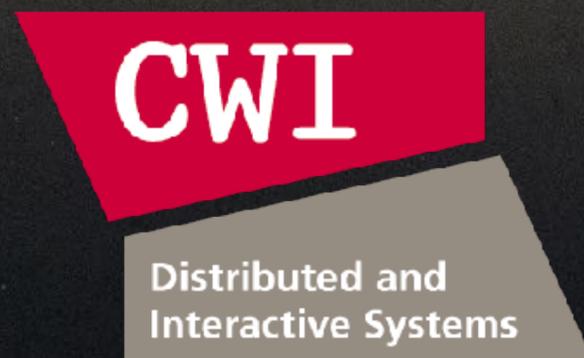

THE FUTURE, I'LL SEE YOU THERE.

- THE CHEMICAL BROTHERS (2015)
